AI Usage Manual Global Trend:

Proceedings of International Conference on Recent Trends in Computing Rajendra Prasad Mahapatra, Sudip Roy, D. Ganesh Gopal, 2026-01-29 This book is a collection of high quality peer reviewed research papers presented at International Conference on Recent Trends in Computing ICRTC 2025 organized by SRM Institute of Science and Technology Ghaziabad Delhi India during July 4 5 2025 The book is divided into two volumes and discusses a wide variety of industrial engineering and scientific applications of the emerging techniques The book presents original works from researchers from academic and industry in the field of networking security big data and the Internet of Things

Anticipating Future Business Trends: Navigating Artificial Intelligence Innovations Rim El Khoury, 2024-09-12 In an age marked by swift technological advancements businesses find themselves amidst unparalleled challenges and opportunities This book aims to deliver a comprehensive exploration of the dynamic technological landscape and its profound impact on the business world This groundbreaking book intends to serve as an invaluable guide for entrepreneurs business leaders and innovators providing them with the tools to anticipate and harness emerging technological trends for a competitive edge in the global market This book represents a pioneering exploration at the confluence of technology and business evolution In a time where everything is turning digital the book strives to empower business leaders entrepreneurs and professionals with the knowledge and insights essential for navigating the ever shifting terrain of technology and its influence on the future of business This book sets the tone by emphasizing the critical role of technology in shaping the future of business It highlights the rapid pace of technological advancements and their far reaching implications setting the stage for a deep dive into the key trends that will define the future of business This book promises to be an indispensable guide for those seeking to stay ahead in the competitive world of business By providing actionable insights and strategic foresight this book aims to empower readers to harness the full potential of emerging technologies for sustainable business success

Artificial intelligence for food safety van Meer, F.; van der Velden, B.; Takeuchi, M., Artificial Intelligence AI is increasingly applied in food safety management offering new capabilities in data analysis predictive modelling and risk based decision making A review of the literature identifies three primary areas of application scientific advice inspection and border control and operational activities of food safety competent authorities Five country examples with the real world use cases illustrate diverse uses of AI tools including pathogen detection import sampling prioritization and language models for regulatory data processing Regulatory frameworks as well as voluntary governance addressing AI in the public sector are emerging worldwide National and international initiatives often highlight the importance of data governance transparency ethical considerations and human oversight Challenges such as biased data explainability and data governance gaps appear across different contexts along with potential risks from deploying AI systems prematurely Access to high quality interoperable data and collaboration among stakeholders can support effective integration of AI technologies AI readiness often depends on understanding

specific problems to be addressed current capacities and the quality of available data Human oversight and continuous evaluation contribute to maintaining trust in AI systems Collaborative efforts involving academia the private sector and international organizations help build shared knowledge and resources for AI development in food safety Overall AI presents opportunities to enhance resilience efficiency and responsiveness in food safety systems Careful consideration of governance data management and multi stakeholder cooperation can shape AI s contribution to achieving sustainable and equitable outcomes in agrifood systems

Impact of Artificial Intelligence on Data-Driven Decision Making in HR for Revolutionizing Organizational Growth Himanshu Rai,Arti Gupta,Rohit Bansal,2025-10-23 In this era of transition from traditional people centric Human Resources HR to data driven and unbiased approaches this collection not only highlights Artificial Intelligences s AI revolutionary potential but also addresses the challenges and ethical considerations of AI deployment in the workplace *Proceedings of the International Conference on Advances and Applications in Artificial Intelligence (ICAAAI 2025)* Suman Kumar Swarnkar,Yogesh Kumar Rathore,2025-07-23 This open access volume presents select proceedings of the International Conference on Advances and Applications in Artificial Intelligence ICAAAI 2025 It covers AI fundamentals machine learning deep learning NLP computer vision robotics and ethical AI Key application areas include healthcare industry automation smart cities agriculture education cybersecurity and business

Proceedings of 20th Iberian Conference on Information Systems and Technologies (CISTI 2025) Alvaro Rocha,Francisco García Peñalvo,Carlos J. Costa,Ramiro Gonçalves,2026-02-14 This book comprises peer reviewed papers selected for presentation and discussion at the 20th Iberian Conference on Information Systems and Technologies CISTI 2025 held from June 16 to 19 2025 at ISEG Lisbon School of Economics and Management University of Lisbon Portugal CISTI 2025 is a leading international forum that brings together researchers practitioners and industry experts to exchange the latest research findings innovative solutions emerging trends professional experiences and key challenges across various domains of information systems and technologies The conference also emphasizes recent technological advancements and their practical applications The book covers essential topics such as A organizational models and information systems B knowledge management and decision support systems C software systems architectures applications and tools D computer networks mobility and pervasive systems E human centered computing F health informatics G information technologies in education and H architecture and engineering of construction The primary audience for this publication includes postgraduate students researchers and academics in information systems and technologies It also serves as an essential reference for undergraduate students and professionals in related fields Chapter Leveraging Technology for Public Health Intervention A Case Study of Chatbots in Addressing Domestic Violence is available open access under a Creative Commons Attribution 4 0 International License via link springer.com

Artificial Intelligence: From Zero To Practical Use Kael Novera,2025-11-04 Artificial Intelligence is no longer the future it is the present In this accessible and engaging guide Kael

Novera takes readers on a journey that transforms curiosity into practical knowledge. In a clear and human way, the book explains what AI is, how it came about, how it works, and how to apply it in everyday life, even if you have never used it before. Using simple language and real-life examples, the author shows how AI is changing careers, businesses, and habits, revealing essential tools such as ChatGPT, Midjourney, Copilot, and more. Throughout the chapters, readers learn how to use technology to increase productivity, stimulate creativity, and create new opportunities without needing to know how to program. More than a technical manual, this is a guide to personal and professional transformation, teaching you how to think smart in the digital age. Master AI practice and see real results. Because the future isn't about replacing people with machines, it's about expanding what people are capable of doing with them.

[UAV Aerodynamics and Crop Interaction](#) Imran, Jiyu Li, 2025-07-26

This book offers insights into how drone aerodynamics influence crop growth, yield, and resilience, and explores the potential of UAV technology. By bridging advanced engineering principles with precision agriculture, it presents practical methods for optimizing UAV operations to enhance microclimates, improve crop health, and boost productivity. Readers will find in-depth analyses supported by compelling results, clear case studies, and high-quality illustrations that vividly demonstrate the interaction between UAV downwash airflow and crop morphology. Special features include detailed schematics, data-driven tables, and a step-by-step guide to designing UAV systems tailored for agricultural applications. This comprehensive approach ensures that readers not only understand the science but are also equipped to implement innovative techniques in real-world scenarios. The primary audience of this book includes undergraduates and graduate students, crop scientists, agronomists, agricultural engineers, UAV researchers, policymakers, and advanced students seeking to revolutionize sustainable farming practices through cutting-edge drone technologies.

[Building Trust in the Generative Artificial Intelligence Era](#) Joanna Paliszkievicz, Jerzy Gołuchowski, Magdalena Mądra-Sawicka, Kuanchin Chen, 2025-06-27

In an era where generative artificial intelligence (AI) is reshaping industries and daily life, trust has become a cornerstone for its successful adoption and application. *Building Trust in the Generative Artificial Intelligence Era: Technology, Challenges, and Innovations* explores how trust can be built, maintained, and evaluated in a world increasingly reliant on AI technologies. Designed to be accessible to a broad audience, this book blends theoretical insights with practical approaches, offering readers a comprehensive understanding of the topic. The book is divided into three parts: The first part examines the foundations of trust in generative AI, highlighting trends and ethical challenges such as greenwashing and remote work dynamics. The second part provides actionable frameworks and tools for assessing and enhancing trust, focusing on topics like cybersecurity, transparency, and explainability. The final section presents global case studies exploring university students' perceptions of ChatGPT, generative AI's applications in European agriculture, and its transformative impact on financial systems. By addressing both the opportunities and risks of generative AI, this book delivers groundbreaking insights for academics, professionals, and policymakers worldwide. It emphasizes practical solutions, ensuring readers gain the knowledge needed to navigate the
