

## Mapping the Ocean Floor

You are going to draw a profile of the sea floor under the Atlantic Ocean. You will use actual measurements taken from a ship during a research voyage between Nova Scotia (Sambro) and France (Souloc).

### Procedure:

1. Make a graph like the one shown below. Label the axes and give the graph a title.

| Station number | Longitude (° West) | Depth to ocean floor (m) |
|----------------|--------------------|--------------------------|
| 1              | 1                  | 0                        |
| 2              | 4                  | 125                      |
| 3              | 5                  | 4250                     |

2. The data table on the right shows a series of depths to the ocean floor. The measurements were taken at 19 different points along a line.
3. Plot each data point on your graph. Connect the points with a smooth line.

### Analysis:

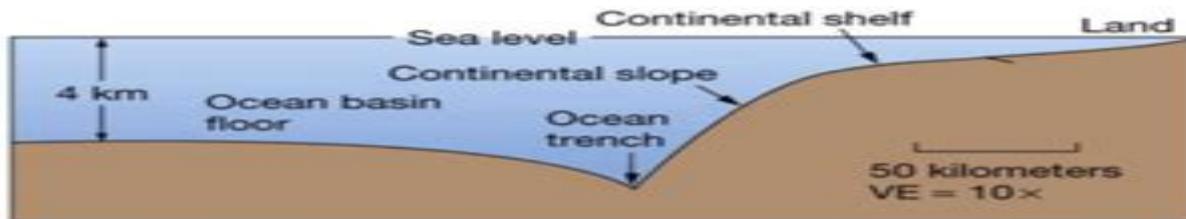

When you have completed the graph, answer the following questions.

1. On your graph label: abyssal plain (twice), continental shelf (twice), continental slope (twice) and mid-ocean ridge.
2. How would you expect the ocean floor to look at the abyssal plain?
