Bahamian Students' Experiences with Mathematics in American Universities and Colleges Nikki Rochelle Cleare, 2011
This longitudinal qualitative multi case study examines the mathematical experiences of three Bahamian students pursuing science degrees in American universities and its relationship to their previous mathematical experiences in their Bahamian high schools Drawing on cultural psychology and sociocultural theories of learning this study found that the relationship between the academic preparedness of the participants on their experiences with collegiate mathematics is not limited to subject content only The lessons learnt from the implied curriculum also play a role in their experiences with collegiate mathematics Of the three participants two have had to learn develop techniques for studying because they had not been sufficiently challenged in their previous environments to do so Each of the cases also highlights some powerful constructs needed for success in mathematics and at least two emphasize making connections between concepts procedures manipulatives tools and multiple approaches when solving problems This study contributes to an emerging area of research on student persistence in college level mathematics courses as well as to the ongoing discussions in mathematics education regarding the role importance of conceptual understanding and how to promote it The study makes visible some of the ways in which students post secondary experiences with mathematics are shaped by their perception of their mathematical preparation thus providing a basis for discussions of possible curricular change in the Bahamas It also suggests that issues such as confidence and school teacher expectations of students may play a role in the development of conceptual understanding

Vocationalisation of Secondary Education Revisited Jon Lauglo, R. Maclean, 2006-03-30 The book is a cutting edge contribution to the debate which has occurred for some time on the pros and cons of secondary education becoming more closely and explicitly related to preparing young people for the world of work The book provides concrete examples of the vocationalisation of secondary education with particular reference to the situation in Africa The target audience for the book includes policy makers practitioners administrators education planners researchers teachers and teacher educators with a concern about the relationship between secondary education and education for the world of work with particular reference to technical and vocational education and training TVET The book appears in the Springer book series on Technical and Vocational Education and Training Issues Concerns and Prospects and compliments the International Handbook of Technical and Vocational Education and Training and other publications in the International Library of TVET all of which are publications of the UNESCO UNEVOC International Centre for TVET in Bonn Germany
