The Internet of Things Scott J. Shackelford, 2020 The Internet of Things IoT is the notion that nearly everything we use from gym shorts to streetlights will soon be connected to the Internet the Internet of Everything IoE encompasses not just objects but the social connections data and processes that the IoT makes possible Industry and financial analysts have predicted that the number of Internet enabled devices will increase from 11 billion to upwards of 75 billion by 2020 Regardless of the number the end result looks to be a mind boggling explosion in Internet connected stuff Yet there has been relatively little attention paid to how we should go about regulating smart devices and still less about how cybersecurity should be enhanced Similarly now that everything from refrigerators to stock exchanges can be connected to a ubiquitous Internet how can we better safeguard privacy across networks and borders Will security scale along with this increasingly crowded field Or will a combination of perverse incentives increasing complexity and new problems derail progress and exacerbate cyber insecurity For all the press that such questions have received the Internet of Everything remains a topic little understood or appreciated by the public This volume demystifies our increasingly smart world and unpacks many of the outstanding security privacy ethical and policy challenges and opportunities represented by the IoE Scott J Shackelford provides real world examples and straightforward discussion about how the IoE is impacting our lives companies and nations and explain how it is increasingly shaping the international community in the twenty first century Are there any downsides of your phone being able to unlock your front door start your car and control your thermostat Is your smart speaker always listening How are other countries dealing with these issues This book answers these questions and more along with offering practical guidance for how you can join the effort to help build an Internet of Everything that is as secure private efficient and fun as possible
