*Health Communication* Nancy Grant Harrington,Rachael A. Record,2023-08-02

This thoroughly revised second edition covers the major areas of research theory and practical application in health communication. This textbook takes an in-depth approach to health communication by analyzing and critically evaluating research conducted across multiple paradigmatic perspectives and focusing on translational application of research findings. Using the story of the Montgomery family, a biracial multigenerational family and their health experiences as a case study, chapters explore topics including patient-provider communication, health communication in the media, ethical issues, and public health crises. New chapters cover the potential for communication to address discrimination in healthcare settings, health information seeking, social support, and caregiving, and the relationship between health and environmental communication. Chapters offer pedagogical features that will prove useful to students and instructors of health communication, such as summary boxes, theory tables, suggestions for in-class activities, discussion questions, and lists of additional resources. Developed for use in advanced undergraduate and master's level health communication and public health courses, this text represents the breadth and depth of health communication theory and research as it exists today. Online resources for instructors, including additional theory tables, PowerPoint slides, test questions, and assignments, sample syllabi, and lists of additional resources are available at <https://www.routledge.com/9781032100470>.

**Peer to Peer and the Music Industry**, Matthew David, 2010. Have the music and movie industries lost the battle to criminalize downloading? This penetrating and informative book provides readers with the perfect systematic critical guide to the file-sharing phenomenon. Combining interdisciplinary resources from sociology, history, media, and communication studies, and cultural studies, David unpacks the economics, psychology, and philosophy of file sharing. The book carefully situates the reader in a field of relevant approaches, including Network Society Theory, Post-structuralism, and ethnographic research. It uses this to launch into a fascinating enquiry into the rise of file sharing, the challenge to intellectual property law posed by new technologies of communication, the social psychology of cyber crime, and the response of the mass media and multi-national corporations. The book concludes with a balanced, eye-opening assessment of alternative cultural modes of participation and their relationship to cultural capitalism. This is a landmark work in the sociology of popular culture and cultural criminology. It fuses a deep knowledge of the music industry and the new technologies of mass

communication with a powerful perspective on how multinational corporations seek to monopolize markets how international and state agencies defend property while a global multitude undermine and or reinvent both *Book of Lists* ,2010
