Advanced Practice Nursing: Essential Knowledge for the Profession Susan M. DeNisco,2023-02-07 Advanced Practice Nursing Essential Knowledge

for the Profession Fifth Edition is a core advanced practice text used in both Master's Level and DNP programs. This text is centered around a compilation of existing chapters from a variety of high level Jones Bartlett Learning works creating a comprehensive and well rounded resource for the advanced practice nursing student.

Essentials of Nursing Research
Denise F. Polit, Bernadette P. Hungler, 1997
This introductory nursing research text assists students in evaluating research findings in terms of their scientific merit and potential of utilization. The text compares naturalistic inquiries, qualitative studies and traditional scientific research, quantitative studies with regard to each aspect of a study. In chapter research examples both fictitious and actual provide the student with opportunities to critically read and analyze the strengths and weaknesses of the studies in relation to concepts presented in each chapter. Two full research reports included at the end of the text facilitate the development of critical reading skills. The Fourth Edition features a stronger balance of qualitative and quantitative research and increased coverage of Research Utilization content. The steps in a research utilization project are identified and an example is provided.

A Uro-Oncology Nurse Specialist's Reflection on her Practice Journey
Beverly Anderson, 2022-03-22
This book provides a unique insight and background of a uro oncology nurse's career from a personal and professional perspective, one that encapsulates the ever changing dynamics in the nursing profession over 40 years, 1970's to current 2022. In writing this book the objective is to devise a beneficial point of reference, one that is conducive to enlightening individuals within the healthcare profession and the wider context on the art of reflection and acknowledging its benefits in terms of exploring their feelings and understanding their meaning. Reflection is a highly beneficial tool. In this context the process enables the author to reflect constructively on her nursing career and practice to highlight the positive as well as the negative aspects within that practice and illustrate how the experiences gained have contributed to her development personally and professionally throughout that journey. Reflection includes deliberate reflection on experience, emotions, actions and responses and acknowledging how essential these have been to informing the author's existing knowledge base and in ensuring a higher level of learning and understanding. In the continued quest to deliver optimal healthcare the objective of reflection is in enabling healthcare individuals, e.g. nursing students, newly qualified nurses or those considering change of nursing speciality to better understand their patients from a holistic standpoint, physical, psychological, psycho-social, spiritual, cultural and economic and ultimately improving the individual patient's overall experience, cancer or otherwise as well as improving and enhancing practice outcomes. The importance of reflection and its contribution to increasing the healthcare professional's self awareness, emotional, personal and professional is also well underlined. Various Modules and Case Studies within the book are used to explain and highlight key issues and to enhance content and visual acuity.
