Evolution Of The Marketing Concept Link Springer:

   Digital Sport Marketing Alan Seymour,Paul Blakey,2020-09-10 Digital sport marketing is a new dynamic and rapidly evolving area that is having a profound impact on contemporary sport business This is the only textbook to introduce core principles and best practice in digital sports marketing focusing on key issues emerging topics and practical techniques The book surveys the new international digital landscape in sport business and explains how to apply digital marketing across key areas from fan engagement and public relations to strategic communication and branding Every chapter includes discussion of key concepts an in depth case study and an in depth conversation with a leading industry practitioner that demonstrates how digital marketing works in the real world Full of useful features this is an essential textbook for any sport marketing sport management sport business or sport development course   **BRAIN BLOOMERS (VOLUME 2)** Prof. Amitava Basu,Dr. Santanu Mallick,Dr. Amalendu Samanta,Prof. Arunava Narayan Mukherjee,   Dynamics of the Changing Global Security Order Lorenzo Fiorito,Nesrin Kenar,Senthan Selvarajah,2023-10-16 Dynamics of the Changing Global Security Order Emerging Trends and Key Issues in Asia presents knowledge insights and understanding of why and how the US led unipolar world order is shifting more in a multipolar direction It demonstrates the influence of power contests involving economic and military weaponry on this new development It reveals the impact this transformation will have on international security and the challenges crises and risks that humanity faces This volume systematically explores its hypothesis through newly evolving theoretical positions such as geoeconomics socio economic political and cultural implications tensions at the national regional and global levels as well as debates trends policies practices and examples concerning power and international relations praxis   **Harnessing AI and Digital Twin Technologies in Businesses** Ponnusamy, Sivaram,Assaf, Mansour,Antari, Jilali,Singh, Satyanand,Kalyanaraman, Swaminathan,2024-07-26 The intersection of artificial intelligence AI and digital twin technology presents a problem and an unparalleled opportunity for transformation Businesses grapple with the need for operational excellence innovation and a competitive edge all while navigating the intricate web of data analytics decision making and real time monitoring In response to these challenges Harnessing AI and Digital Twin Technologies in Businesses emerges as an example of insight and guidance offering a comprehensive exploration of the complementary connection between AI and digital twin technology In a world where the convergence of these powerful tools transforms business intelligence enabling initiative taking decision making and dynamic simulations This book serves as a solution for decision makers technologists and researchers seeking to not only understand but harness the potential of AI powered digital twins to enhance productivity creativity and judgment in their operations   Capitalism, Power and Innovation Cecilia Rikap,2021-03-29 In contemporary global capitalism the most powerful corporations are innovation or intellectual monopolies The book s unique perspective focuses on how private ownership and control of knowledge and data have become a major source of rent and power The author explains how at the one pole these corporations concentrate

income property and power in the United States China and in a handful of intellectual monopolies particularly from digital and pharmaceutical industries while at the other pole developing countries are left further behind The book includes detailed empirical mappings of how intellectual monopolies develop and transform knowledge from universities and open source collaborations into intangible assets The result is a strategy that combines undermining the commons through privatization with harvesting from the same commons The book ends with provoking reflections to tilt the scale against intellectual monopoly capitalism and arguing that desired changes require democratic mobilization of workers and citizens at large This book represents one of the first attempts to capture the contours of an emerging new era where old perspectives lead us astray and the old policy toolbox is hopelessly inadequate This is true for the idea that the best or only way to promote innovation is to transform knowledge into private property It is also true for anti trust policies focusing exclusively on consumer prices The formation of global infrastructures that lead to natural monopolies calls for public rather than private ownership Scholars and professionals from the social sciences and humanities in particular economics sociology political science geography educational science and science and technology studies will enjoy a clear and all embracing depiction of innovation dynamics in contemporary capitalism with a particular focus on asymmetries between actors regions and topics In fact its topical issue broadens the book s scope to those curious about how innovation networks shape our world
