Learning 50 Years On tackles these key questions fifty years after the publication of Arthur Reber's seminal text. Providing an overview of recent developments in the field, the volume considers questions about the computational foundations of learning alongside phenomena including conditioning, memory formation and consolidation, associative learning, cognitive development and language learning. Featuring contributions from international researchers, the book uniquely integrates Western thinking on implicit learning with insights from a rich Russian research tradition. This approach offers an excellent opportunity to contrast perspectives, to introduce new experimental paradigms and to contribute to ongoing debates about the very nature of implicit learning. *Implicit Learning 50 Years On* is essential reading for students and researchers of consciousness, specifically those interested in implicit learning.
