pedagogy vis vis recent trends in mainstream applied linguistics and illustrates through several case studies that language focused instruction including CL inspired instruction is a useful if not indispensable complement to learner autonomous incidental acquisition The second part demonstrates how CL research can help pedagogues identify hitherto neglected language elements that merit explicit targeting in second language instruction The third part consists of contributions that put the pedagogical efficiency of several CL inspired interventions to the test in classroom experiments Additions to the currently available armoury of teaching methods are proposed The kinds of target language items under examination in the book range from single words over multiword units to grammar patterns Throughout the volume illustrates how much pedagogy oriented Cognitive Linguistics has matured in recent years
