Foreign Language Pronunciation, from Theory to Practice Zdena Králová, Katarína Nemčoková, Juraj Datko, 2021-09-16 This book comprehensively deals with foreign language pronunciation. It considers several essential issues including the relationship between native and foreign language pronunciations, the problems of non-native learners when learning foreign language pronunciation, and the factors that can positively or negatively affect its learning. The book analyses foreign language pronunciation from both the linguistic and pedagogical points of view. It will thus appeal to all foreign language learners, teachers, linguists, and methodologists.

Developing Materials for Language Teaching Brian Tomlinson, 2013-12-19 There have been a number of books published on various aspects of materials development for language teaching, but *Developing Materials for Language Teaching* is the only one which provides a comprehensive coverage of the main aspects and issues in the field. This second edition brings it completely up to date and expands on the original book. It deals with advances in IT and an increasingly globalized world. It is the only publication which views current developments in materials development through the eyes of developers and users of materials from all over the world. In doing so, it applies principles to practice in ways demonstrated to facilitate the effectiveness of language learning materials. The chapters are written so that the book provides critical overviews of recent developments in materials development and at the same time acts as a stimulus for development and innovation in the field. It is intended both for use as a course book on postgraduate and teacher training courses and as a resource for the stimulus and refreshment of teachers, publishers, and applied linguists in the field. The book contains updated versions of many of the chapters in the 2003 edition, plus new chapters on corpus-informed materials development, materials development for blended learning, materials development for EAP, materials development for ESOL, and materials development for young learners.

The Routledge Handbook of Materials Development for Language Teaching Julie Norton, Heather Buchanan, 2022-03-16 The *Routledge Handbook of Materials Development for Language Teaching* is the definitive resource for all working in this area of language and English language teaching. With 34 chapters authored by leading figures from around the world, the Handbook provides an historical overview of the development of language teaching materials, critical discussion of core issues, and an assessment of future directions. The contributions represent a range of different international contexts, providing insightful state-of-the-art coverage of the field. Structured in nine sections, the Handbook covers changes and developments in language teaching materials, controversial issues in materials development research, and materials development materials for language learning and skills development, materials evaluation and adaptation, materials for specific contexts, materials development and technology, developing materials for publication, professional development, and materials writing. Demonstrating throughout the dynamic relationship between theory and practice, this accessible Handbook is essential reading for researchers, scholars, and students on MA programmes in ELT, TESOL, and applied linguistics.
