The five sections of the volume encompass a wide range of topics from a variety of perspectives: applied linguistics in action, language learning, language education, language culture and identity, perspectives on language in use, and descriptions of language for applied linguistics. The forty-seven chapters connect knowledge about language to decision making in the real world. The volume as a whole highlights the role of applied linguistics, which is to make insights drawn from language study relevant to such decision making. The chapters are written by specialists from around the world. Each one provides an overview of the history of the topic, the main current issues, and possible future trajectory. Where appropriate, authors discuss the impact and use of new technology in the area. Suggestions for further reading are provided with every chapter.
