Integration of Photogrammetry, Reflectance Transformation Imaging (RTI), and Multiband Imaging (MBI) for Visualization, Documentation, and Analysis of Archaeological and Related Materials Emily B. Frank, Sebastian Heath, Chantal Stein, 2021 This paper describes a practical workflow that enables the integration of Photogrammetry based 3D modeling Reflectance Transformation Imaging RTI and Multiband Imaging MBI into a single representation that can in turn be rendered visually using existing open source software To illustrate the workflow we apply it to a fragment of an Egyptian painted wood sarcophagus now in the Institute of Fine Arts Study NYU Collection and then show how the results can contribute to the visualization documentation and analysis of archaeological and related materials One product of this work is an animation rendered using the open source software Blender The animation emphasizes aspects of surface

variation and reveals the craftwork involved in producing the sarcophagus fragment In doing so it highlights that the workflow we describe can serve many purposes and contribute to a wide variety of research agenda *Innovation and Implementation* Richard Veit, Harold Mytum, 2023-07-14 Providing a comprehensive set of guidance to assist researchers wishing to carry out curate and disseminate field research at a historic burial ground chapters offer up to date methods for surface and subsurface survey and for the recording and archiving of burial monument data Divided into three parts considering documentary research and recording of mortuary landscapes reflections on memorial recording projects and archiving and wider dissemination of data and interpretations Also included is the archaeological potential of pet cemeteries and other pet memorials Discussions therefore include how methodologies may or may not be applicable to both human and animal subjects *Research and Innovation for Sustainable Development Goals* Rajshree Bedamatta, Boeing Laishram, Sparsh Johari, 2024-09-13 Almost immediately after the UN Secretary General called for a Decade of Action to deliver Sustainable Development Goals at the SDG Summit of 2019 the world faced massive COVID 19 induced disruptions at the cost to the global economy To accelerate progress in the SDGs the decade of 2020 2030 requires research innovations and commitments of various stakeholders at all levels locally nationally and globally This book contributes to the action agenda by focusing on India s opportunities and challenges emphasizing India s northeast Many countries have taken significant actions toward realizing the SDG mission and vision However due to a lack of knowledge research and innovation there is a considerable disparity in the countries actions Few developed countries have made significant progress in realizing the SDGs while many developing countries struggle This book brings together diverse views on various domains of SDGs providing a sub national framework for addressing the gaps and meeting the goals [Damqatum - Number 7 \(2011\) English](#) Francisco Céntola, Virginia Laporta, 2011-12-31 Damqatum is a journal dedicated to the history and archaeology of the Near East oriented to the general public **Prehistories of writing** Gwenola Graff, Alejandro Jiménez Serrano, 2016 La gen se des premi res critiques suscite toujours beaucoup d'int r t et reste souvent mal comprise Ce colloque a eu pour ambition de faire se rencontrer des sp cialistes qui travaillent sur diff rents syst mes graphiques attest s au IVe mill naire en Egypte Ils ont examin s diff rents supports d'image cette p riode en Egypte et avec des comparatifs en M sopotamie avant de s interroger aussi sur le lien entre l crit et l image la pratique graphique implique e et le contexte socio culturel dans lequel cette transformation s est produite et le statut du signe 0Il semble en effet que la relation entre le signe et le support puisse tre une clef de compr hension Des pistes tr s prometteuses et novatrices sont ouvertes par la prise en compte des techniques de m morisation de performances orales li es la pratique rituelle [Advances in Acquisition and Rendering of Image Based Digital Models](#) Prabath Gunawardane Heeralu Pathirannahalage Don, 2011 [Pseudo Three-Dimensional MEMS Imaging Using Reflectance Transformation Imaging \(RTI\) Technique](#) Sahar Ahmadi, 2021 The study of MEMS devices is highly dependent on the information that imaging techniques can provide There are two main approaches to observe MEMS devices

Optical and non optical imaging techniques Although each of the techniques has its own advantages and disadvantages optical microscopy is of great interest due to its low cost accessibility resolution and the colored images it provides A critical shortcoming of optical microscopy is the strict viewing direction and lighting angle that result in flat images with no visual representation of MEMS 3D structure that may lead to some confusion in terms of interpreting the topography of MEMS surfaces and their out of plane displacements This thesis aims at enhancing the 2D representation of MEMS devices by capturing a sequence of images at different illumination angles and highlighting the lateral facets based on the RTI imaging technique and then creating a sequence of post processed images The proposed algorithm offers a rapid non invasive cost effective and non contact imaging technique that aims at minimizing the necessity of using other imaging approaches by revealing the 3D aspects of MEMS devices in terms of 2D visualization

Shepherds who Write Marta Bazzanella,Giovanni Kezich,2020 In a number of significant sites of the vast ancient pasturelands of the Old World generations of wandering shepherds have left their testimony in the form of graffiti drafted on the rocks sometimes in their tens of thousands over a period of hundreds of years from ancient to modern times The phenomenon is a conspicuous one and has considerable significance for two reasons On the one hand the study of such pastoral graffiti may convey fresh ethnoarchaeological information as to the circumstances of the pastoral activities and the pastoral economy of the past On the other hand these signs which can be often fully alphabetic as well as drawing upon ancient symbolic repertoires can be of some aid in the interpretation of rock art as a whole genre of human expression and projected back in their significance and their modes of appearance the earliest times of prehistory

Les royaumes de Chypre à l'épreuve de l'histoire Anna Cannavò,Ludovic Thély,2018 Dans le cadre du renouveau que connaissent les tudes sur

Chypre l'âge du Fer ce volume apporte une réflexion sur le thème des continuités ruptures et changements qui accompagnent l'histoire des royaumes chypriotes du Ier millénaire avant notre ère. On y examine les évolutions politiques en insistant sur le passage d'un mode de gouvernement à un autre, les transitions culturelles avec la création de la coinpan chypriote d'époque géométrique, la naissance des styles régionaux ou encore l'impact de l'hellénisme, les modifications ou la continuité des structures économiques avec les dynamiques d'exploitation du territoire et leurs conséquences sur l'évolution des limites territoriales des royaumes chypriotes. Sans nier ou diminuer la radicalité et l'importance de certains phénomènes ou événements de l'hellénisation de l'île conquise par les Lagides en passant par l'enracinement de la présence phénicienne, l'époque archaïque et la grandissante influence athénienne pendant l'époque classique, on évalue l'impact, la lumière et d'autres facteurs essentiels, parfois moins visibles et plus difficiles à saisir en raison du biais de la documentation disponible. La perspective chyrocentrique paraît ainsi celle qui permet le mieux de refonder sur de nouvelles bases méthodologiques et théoriques l'analyse de l'histoire et des caractéristiques constitutives des royaumes chypriotes. Archéologues, épigraphistes, numismates, historiens, céramologues, spécialistes de tout horizon scientifique apportent ainsi leur regard, soit par l'étude de cas ciblés dont plusieurs découvertes récentes soit en dégageant des caractéristiques communes à l'ensemble des royaumes. *Αρχαιολογικόν Δελτίον*, 2015

Reflectance Transformation Imaging Rachel Gill, 2018. In the late 19th century explorers identified graffiti etched in stucco walls of residences, palaces and temples in the Maya Lowlands. By the mid 20th century scholars acknowledged that the ancient Maya produced these incised images. Today archaeologists struggle with documenting these instances of graffiti with precision and accuracy, often relying solely on to-scale line drawings to best represent the graffitied image they see before them. These images can be complex, multilayered and difficult to see, so identifying the sequence of creation of the incisions can be challenging. Reflectance Transformation Imaging (RTI) is a method that uses a moving light source and photography in order to visualize, interact with and analyze a three-dimensional object in a two-dimensional image. Performed on a series of 20 unique graffiti from the Maya archaeological site of Holtun, RTI showed promise as a viable technique for documenting and preserving graffiti as cultural heritage and for providing new information about an enigmatic aspect of Maya archaeology. Additionally, RTI is compared to other common methods used to document incised graffiti in the Maya lowland area, including to-scale line drawing, tracing, photogrammetry and scanning, to show the new and unique information and data that can be gathered from this method. Finally, RTI is a low-cost, low-maintenance alternative data-gathering method for highly remote archaeological projects where other technology is difficult to obtain and use in the field setting. *Archivní časopis*, 2017
