Woodson,2009-06-22 The success of a repair or rehabilitation project depends on the specific plans designed for it Concrete  
Structures Protection Repair and Rehabilitation provides guidance on evaluating the condition of the concrete in a structure  
relating the condition of the concrete to the underlying cause or causes of that condition selecting an appropriate repair  
material and method for any deficiency found and using the selected materials and methods to repair or rehabilitate the  
structure Guidance is also provided for engineers focused on maintaining concrete and preparing concrete investigation  
reports for repair and rehabilitation projects Considerations for certain specialized types of rehabilitation projects are also  
given In addition the author translates cryptic codes theories specifications and details into easy to understand language Tip  
boxes are used to highlight key elements of the text as well as code considerations based on the International Code Council  
or International Building Codes The book contains various worked out examples and equations Case Studies will be included  
along with diagrams and schematics to provide visuals to the book Deals primarily with evaluation and repair of concrete

Universities of Cape Town and The Witwatersrand and The Construction Materials Sections at Leipzig University and MFPA  
Leipzig in Germany The background in industry and the state of national infrastructures continues to be highly challenging  
and demanding The facts remain that much of our concrete infrastructure deteriorates at unacceptable rates that we need  
appropriate tools and techniques to undertake the vast task of sound repair maintenance and rehabilitation of such

infrastructure and that all this must be undertaken with due cognisance of the limited budgets available for such work New ways need to be found to extend the useful life of concrete structures cost effectively Confidence in concrete as a viable construction material into the 21st century needs to be retained and sustained particularly considering the environmental challenges that the industry and society now face The conference proceedings contain papers presented at the conference and classified into a total of 12 sub themes which can be grouped under the three main themes of i Concrete durability aspects ii Condition assessment of concrete structures and iii Concrete repair rehabilitation and retrofitting The major interests in terms of submissions exists in the fields of innovative materials for durable concrete construction integrated service life modelling of reinforced concrete structures NDE NDT and measurement techniques repair methods and materials and structural strengthening and retrofitting techniques The large number of high quality papers presented and the wide range of relevant topics covered confirm that these proceedings will be a valued reference for many working in the important fields of concrete durability and repair and that they will form a suitable base for discussion and provide suggestions for future development and research
