Optimization of Chemical Processes Thomas F. Edgar, David Mautner Himmelblau, 1988

Chemical Process Design and Integration Robin Smith, 2016-08-08 Written by a highly regarded author with industrial and academic experience this new edition of an established bestselling book provides practical guidance for students researchers and those in chemical engineering The book includes a new section on sustainable energy with sections on carbon capture and sequestration as a result of increasing environmental awareness and a companion website that includes problems worked solutions and Excel spreadsheets to enable students to carry out complex calculations

Advanced Control of Chemical Processes (ADCHEM'91) K. Najim, E. Dufour, 2014-05-23 This volume contains 40 papers which describe the recent developments in advanced control of chemical processes and related industries The topics of adaptive control model based control and neural networks are covered by 3 survey papers New adaptive statistical model based control and artificial intelligence techniques and their applications are detailed in several papers The problem of implementation of control algorithms on a digital computer is also considered

Fundamentals of Microelectronics Processing Hong H.

Lee,1990 Process Modeling, Simulation, and Control for Chemical Engineers William L. Luyben,1990 The purpose of this book is to convey to undergraduate students an understanding of those areas of process control that all chemical engineers need to know The presentation is concise readable and restricted to only essential elements The methods presented have been successfully applied in industry to solve real problems Analysis of closedloop dynamics in the time Laplace frequency and sample data domains are covered Designing simple regulatory control systems for multivariable processes is discussed The practical aspects of process control are presented sizing control valves tuning controllers developing control structures and considering interaction between plant design and control Practical simple identification methods are covered

Planning, Scheduling, and Control Integration in the Process Industries C. Edward Bodington,1995 A guide to using computer systems to improve quality and productivity in the process industries for engineers and managers Explains the elements that make up an integrated production system emphasizing planning using computer modeling and nonlinear programming scheduling operations and inventories using systems for both batch and continuous processes and controlling processes Case studies from companies such as Ashland Petroleum Monsanto and Idemitsu Petrochemical Company illustrate how integrated systems work Contains a glossary Annotation copyright by Book News Inc Portland OR *Conceptual Design of Chemical Processes* James Merrill Douglas,1988 This text explains the concepts behind process design It uses a case study approach guiding readers through realistic design problems and referring back to these cases at the end of each chapter Throughout the author uses shortcut techniques that allow engineers to obtain the whole focus for a design in a very short period generally less than two days *Process Control* Don W.
