Stephen Evans,1984 **The A to Z of Existentialism** Stephen Michelman,2010 Existentialism is the philosophy of human existence which flourished first in Germany in the 1920s and 1930s and then in France in the

decade following the end of World War II The operative meaning of existentialism here is thus broader than it was circa 1945 when the term first gained currency in France as a label for the philosophy of Jean Paul Sartre However it is considerably less broad than the view proposed by commentators in the 1950s and 1960s who in an attempt to overcome Sartre s hegemony discovered the seeds of existentialism far and wide in Shakespeare Saint Augustine and the Old Testament prophets In this dictionary existentialism is understood as a decidedly 20th century phenomenon though with roots in the 19th century Effort has been made to understand the philosophy of existentialism as all philosophies should be understood as part of an ongoing intellectual tradition an evolving history of problems concepts and arguments The A to Z of Existentialism explains the central claims of existentialist philosophy and the contexts in which it developed into one of the most influential intellectual trends of the 20th century This is done through a chronology an introductory essay a bibliography and more than 300 cross referenced dictionary entries offering clear accessible accounts of the life and thought of major existentialists like Jean Paul Sartre Martin Heidegger Martin Buber Karl Jaspers Gabriel Marcel Simone de Beauvoir Albert Camus and Maurice Merleau Ponty as well as thinkers influential to its development such as Wilhelm Dilthey Henri Bergson Edmund Husserl and Max Scheler This book affords readers an integrated critical and historically sensitive understanding of this important philosophical movement

The Routledge Companion to the Philosophy of Race Paul Taylor,Linda Alcoff,Luvell Anderson,2017-11-28 For many decades race and racism have been common areas of study in departments of sociology history political science English and anthropology Much more recently as the historical concept of race and racial categories have faced significant scientific and political challenges philosophers have become more interested in these areas This changing understanding of the ontology of race has invited inquiry from researchers in moral philosophy metaphysics epistemology philosophy of science philosophy of language and aesthetics The Routledge Companion to Philosophy of Race offers in one comprehensive volume newly written articles on race from the

world's leading analytic and continental philosophers. It is however accessible to a readership beyond philosophy as well, providing a cohesive reference for a wide student and academic readership. The Companion synthesizes current philosophical understandings of race, providing 37 chapters on the history of philosophy and race as well as how race might be investigated in the usual frameworks of contemporary philosophy. The volume concludes with a section on philosophical approaches to some topics with broad interest outside of philosophy, like colonialism, affirmative action, eugenics, immigration, race and disability, and post-racialism. By clearly explaining and carefully organizing the leading current philosophical thinking on race, this timely collection will help define the subject and bring renewed understanding of race to students and researchers in the humanities, social science, and sciences. *The Philosophy and Literature of Existentialism* Wesley Barnes, 1968

The Philosophy of Being in the Analytic, Continental, and Thomistic Traditions Joseph P. Li Vecchi, Frank Scalambrino, David K. Kovacs, 2020-10-01 This book provides a discussion of the philosophy of being according to three major traditions in Western philosophy: the Analytic, the

Continental and the Thomistic The origin of the point of view of each of these traditions is associated with a seminal figure Gottlob Frege Immanuel Kant and Thomas Aquinas respectively The questions addressed in this book are constitutional for the philosophy of being considering the meaning of being the relationship between thinking and being and the methods for using thought to access being On the one hand the book honors diversity and pluralism as it highlights how the three traditions may be clearly and distinctly differentiated regarding the philosophy of being On the other hand it honors a sense of solidarity and ecumenism as it demonstrates how the methods and focal points of these traditions constitute and continue to shape the development of Western philosophy This book contributes toward an essential overview of Western metaphysics and will be of particular interest to those working in the history of philosophy and in the philosophy of being

Existentialism and Human Emotions Jean-Paul Sartre,2015-12 In this provocative philosophical analysis Jean Paul Sartre refutes the idea that existentialism drains meaning from human life by claiming that the philosophy instead gives man total freedom to achieve his own significance Sartre s Existentialism and Human Emotions is a stirring defense of existentialist thought which argues that existence precedes essence While attacks on existentialism claim that the philosophy leads to a kind of nihilistic gloom Sartre contends that instead existentialism is the only path toward giving man meaning Sartre ultimately argues that by the very absence of a priori meaning an individual can discover and shape his or her own significance and place in the world Sartre turns the typical nihilistic definition of existentialism on its head in this optimistic take on his best known theory
