**Financial Reporting** Krish Bhaskar,John Flower,2021-01-21 Since the global financial crisis of 2007 8 new laws and  
regulations have been introduced with the aim of improving the transparency in financial reporting Despite the dramatically  
increased flow of information to shareholders and the public this information flow has not always been meaningful or useful  
Often it seems that it is not possible to see the wood for the trees Financial scalds continue as Wirecard NMC Health  
Patisserie Valerie going back to Carillion and many more demonstrate Financial and corporate reporting have never been so  
fraught with difficulties as companies fail to give guidance about the future in an increasingly uncertain world aided and  
abetted by the COVID 19 pandemic This concise book argues that the changes have simply masked an increase in the use of  
corporate PR impression management bullet points glossy images and other simulacra which allow poor performance to be  
masked by misleading information presented in glib boilerplate texts images and tables The tone of the narrative sections in  
annual reports is often misleading Drawing on extensive research and interviews with insiders and experts this book charts  
what has gone wrong with financial reporting and offers a range of solutions to improve information to both investors and the  
public This provides a framework for a new era of forward looking corporate reporting and guidance based on often  
conflicting multiple corporate goals The book also examines and contrasts the latest thinking by the regulatory authorities  
Providing a compelling exploration of the industry s failings and present difficulties and the impact of future disruption this  
timely thought provoking book will be of great interest to students researchers and professionals as well as policy makers in  
accounting financial reporting corporate reporting financial statement analysis and governance      **Corporate Financial**
