The Impact of Music on Human Development and Well-Being Michele Biasutti, Graham F. Welch, Jennifer MacRitchie, Gary E. McPherson, Evangelos Himonides, 2020-07-17 Music is one of the most universal ways of expression and communication in human life and is present in the everyday lives of people of all ages and from all cultures around the world. Music represents an enjoyable activity in and of itself but its influence goes beyond simple amusement. Listening to music, singing, playing, composing, and improvising individually and collectively are common activities for many people; these activities not only allow the expression of personal inner states and feelings but also can bring many positive effects to those who engage in them. There is an increasing wealth of literature concerning the wider benefits of musical activity, and research in the sciences associated with music suggests that there are many dimensions of human life—physical, social, psychological, including cognitive and emotional—which can be affected positively by music. The impact that musical activity has on human life can be found in different processes, including a transfer of learning from the musical to another cognitive domain. Abilities that have been developed through music education and training may also be effectively applied in other cognitive tasks. Engagement in successful music activity may also have a positive impact on social skills and social inclusion, thus supporting the participation of the individual in collective and collaborative musical events. The promotion of social participation through music can foster many kinds of inclusion, including intercultural, intergenerational, and support for those who are differently abled. The aim of this Research Topic is to present a diverse range of original articles that investigate and discuss in different ways the crucial role that musical activity can play in human development and well-being.

Sports Coach, 2003 *DS Performance Strength & Conditioning Training Program for Basketball, Speed, Advanced* D. F. J. Smith, 2016-12-02 A 12-week strength conditioning training program for Basketball focusing on speed development for an advanced level. DS Performance have created an exclusive series of sport-specific strength conditioning training programmes that have underpinning evidence-based training methods which have been put in place to improve your performance for all ages and abilities. All programmes have been designed to develop each specific performance variable through the progression of intensity and volume. Along with your training program, this book contains a supporting guide to mobility training. This guide uses myofascial release, static stretching, and activation work to mobilise the major body parts used in training. It has been put in place to increase your mobility; it can also be used to support your warm-ups and cool-downs. To aid your training, we also included a series of tables to create your lifting percentages. These tables will help you work out your working percentages from 40% to 95%. The tables are broken down into 5% loads, all in kilograms, ranging from 10kg to 300kg. All programmes by DS Performance are 12 weeks in duration; we recommend that you do two six-week training blocks with a deloading week between the two training blocks. This will allow the body to recover, prepare you for the second training phase, and reduce any risk of injury. While in Basketball, no two players are exactly alike in size, shape, or skill level; players must

always improve their on court performance by developing key physical attributes Because becoming a great basketball player is so much more than just refining the skills that are on display on the court they need to develop speed power agility and strength for improved performance This is why our programmes have been designed to develop the key physical attributes for Basketball Covering the essential physical aspects to Basketball is just as important as putting the time in on the court Choose your current training level Amateur Intermediate and Advanced for the variable you would like to train and progress your way up to Advanced to really improve your performance The three levels Amateur Intermediate and Advanced represents more your current training age experience and skill level Because weight training and other training methods have a completely different set of skills required when lifting and training correctly compared to your sport DS Performance training programmes are written to run alongside a skill sport specific based training plan DS Performance programmes provide sessions for 3 days of training a week to alternate between your skill sport specific training sessions DS Performance has selected five of the most important physical performance variables attributes for each of the sports that are essential in developing your performance DS Performance strength conditioning training programmes have been written for 20 of the most popular sports globally the sports selected have a wide range of physical attributes and together we have targeted the primary performance variables to develop them for increases in your personal performance DS Performance has been developed to bring elite training methods to everyone from all levels of sporting ability The mission of DS Performance is to make training programmes utilised by professional athletes available to all sporting enthusiasts and performers DS Performance are providing you with training programmes designed by ex Team GB athletes and coaching staff that have the practical and applied experience through a wide range of individual and team based sports Combined with the vast experience an International athlete has on training and peak performance who also are qualified to a minimum of Post Graduate level in the form of Masters Degrees in Sport Science Strength Conditioning [The Ultimate Guide to Weight Training for Basketball](#) Rob Price,2014-05-14 The Ultimate Guide to Weight Training for Basketball is the most comprehensive and up to date basketball specific training guide in the world today It contains descriptions and photographs of nearly 100 of the most effective weight training flexibility and abdominal exercises used by athletes worldwide This book features year round basketball specific weight training programs guaranteed to improve your performance and get you results No other basketball book to date has been so well designed so easy to use and so committed to weight training This book will have players increasing strength power agility and overall quickness on the court leading to an increase in rebounds steals blocked shots and overall defensive efficiency You will build the strength and power needed to dominate the post and under the basket and you will build the stamina and endurance needed to go strong until the final whistle Both beginners and advanced athletes and weight trainers can follow this book and utilize its programs From recreational to professional thousands of athletes all over the world are already benefiting from this book and its techniques and now you
