Windows Presentation Foundation (WPF) replaces Microsoft's diverse presentation technologies with a unified state-of-the-art platform for building rich applications. WPF combines the best of Windows and the Web, fully integrates user interfaces, documents, and media, and leverages the full power of XML-based declarative programming. In *Essential Windows Presentation Foundation*, former WPF architect Chris Anderson systematically introduces this breakthrough platform, focusing on the concepts and techniques working developers need in order to build robust applications for real users. Drawing on his unique experience as an architect on the team, Anderson thoroughly illuminates the crucial new concepts underlying WPF and reveals how its APIs work together to offer developers unprecedented value. Through working sample code, you'll discover how WPF draws on the Web's simple models for markup and deployment, common framework for applications, and rich server connectivity, and on Windows' rich client model.
