Machine Learning Foundations A Case Study Approach:

Reinforcement Learning: Foundations and Applications Mukesh Kumar, Vivek Bhardwaj, Karan Bajaj, Saurav Mallik, Mingqiang Wang,2025-11-28 Reinforcement Learning Foundations and Applications combines rigorous theory with real world relevance to introduce readers to one of the most influential branches of modern Artificial Intelligence Walking readers through the essential principles algorithms and techniques that define reinforcement learning RL the book highlights how RL enables intelligent systems to learn from interaction and optimize decision making in domains such as robotics autonomous control game AI finance and healthcare The book opens with foundational RL concepts including Markov Decision Processes dynamic programming and the exploration exploitation dilemma It then progresses to advanced material covering policy gradient methods actor critic architectures deep reinforcement learning models and multi agent systems Dedicated application chapters demonstrate how RL drives adaptive control sequential decision making and practical problem solving supported by case studies diagrams and algorithm pseudocode Rich with examples research insights and implementation guidance this book equips readers with both the conceptual understanding and applied perspective needed to master reinforcement learning Key Features Blends foundational RL theory with practical application driven case studies Explains both model based and model free reinforcement learning approaches Covers cutting edge methods including Deep Q Networks continuous control and reward shaping Presents clear diagrams pseudocode and implementation notes to support hands on learning Highlights current challenges limitations and emerging research directions in RL *Geophysical, Climatological and Anthropogenic Hazards and Disaster: Vulnerability, Risk Assessment, and Sustainability* Shankar Karuppannan,Sandipan Das,Suresh Kumar,Uday Chatterjee,2024-02-12 Nowadays the whole world faces frequent natural and anthropogenic hazards from drought to flood to deforestation which impends a large number of people into catastrophic destruction and damage Since natural hazards cannot be eliminated quantifying these events and creating reliable forecasts can alleviate their detrimental effects which can help build a more resilient and safe society This Research Topic will comply with the available knowledge of the multi hazards in response to monitoring and management and intends to fulfil the gap between science policy and the community concerned It also focuses on the use of precision techniques remote sensing and GIS technologies for the quantification of various natural and environmental hazards along with the capacity and sustainable mitigation strategies for resilient societies Deep Learning and Its Applications for Vehicle Networks Fei Hu,Iftikhar Rasheed,2023-05-12 Deep Learning DL is an effective approach for AI based vehicular networks and can deliver a powerful set of tools for such vehicular network dynamics In various domains of vehicular networks DL can be used for learning based channel estimation traffic flow prediction vehicle trajectory prediction location prediction based scheduling and routing intelligent network congestion control mechanism smart load balancing and vertical handoff control intelligent network security strategies virtual smart and efficient resource allocation and intelligent distributed resource allocation methods This

book is based on the work from world famous experts on the application of DL for vehicle networks It consists of the following five parts I DL for vehicle safety and security This part covers the use of DL algorithms for vehicle safety or security II DL for effective vehicle communications Vehicle networks consist of vehicle to vehicle and vehicle to roadside communications This part covers how Intelligent vehicle networks require a flexible selection of the best path across all vehicles adaptive sending rate control based on bandwidth availability and timely data downloads from a roadside base station III DL for vehicle control The myriad operations that require intelligent control for each individual vehicle are discussed in this part This also includes emission control which is based on the road traffic situation the charging pile load is predicted through DL andvehicle speed adjustments based on the camera captured image analysis IV DL for information management This part covers some intelligent information collection and understanding We can use DL for energy saving vehicle trajectory control based on the road traffic situation and given destination information we can also natural language processing based on DL algorithm for automatic internet of things IoT search during driving V Other applications This part introduces the use of DL models for other vehicle controls Autonomous vehicles are becoming more and more popular in society The DL and its variants will play greater roles in cognitive vehicle communications and control Other machine learning models such as deep reinforcement learning will also facilitate intelligent vehicle behavior understanding and adjustment This book will become a valuable reference to your understanding of this critical field   Metaheuristic and Machine Learning Optimization Strategies for Complex Systems R., Thanigaivelan,M., Suchithra,S., Kaliappan,Mothilal, T.,2024-07-17 In contemporary engineering domains optimization and decision making issues are crucial Given the vast amounts of available data processing times and memory usage can be substantial Developing and implementing novel heuristic algorithms is time consuming yet even minor improvements in solutions can significantly reduce computational costs In such scenarios the creation of heuristics and metaheuristic algorithms has proven advantageous The convergence of machine learning and metaheuristic algorithms offers a promising approach to address these challenges Metaheuristic and Machine Learning Optimization Strategies for Complex Systems covers all areas of comprehensive information about hyper heuristic models hybrid meta heuristic models nature inspired computing models and meta heuristic models The key contribution of this book is the construction of a hyper heuristic approach for any general problem domain from a meta heuristic algorithm Covering topics such as cloud computing internet of things and performance evaluation this book is an essential resource for researchers postgraduate students educators data scientists machine learning engineers software developers and engineers policy makers and more   IoT and AI in Agriculture Tofael Ahamed,2023-04-10 This book reviews recent innovations in the smart agriculture space that use the Internet of Things IoT and sensing to deliver Artificial Intelligence AI solutionsto agricultural productivity in the agricultural production hubs In this regard South and Southeast Asia are one of the major agricultural hubs of the world facing challenges of climate change and feeding the fast growing
