From there you'll be taken on a guided visual journey that encompasses what can be seen at any give time for all levels of observers.

Philip's Stargazing with Binoculars Robin Scagell, David Frydman, 2007 This is a brand new title for Philip's bestselling astronomy list following the success of Philip's *Guide to Stargazing with a Telescope*. Binoculars provide a great start in astronomy. Compared with telescopes they are comparatively cheap and easy to use they are light and compact and can be used for many other activities such as bird watching. But when you are out there on a starry night how do you know what to look at? Where are the best objects to observe through binoculars? Just how much can you see and what are the tips and tricks of getting the most out of them? Philip's *Stargazing with Binoculars* reveals what to expect from a pair of binoculars and how to choose the right ones if you are buying for the first time or up grading. It gives straightforward explanations of how they work and how to progress from first time user to hobby observer. It gives practical help for setting up and using any binoculars and provides lists of objects to look at with different sizes of binoculars from both town and country including the Sun Moon

planets comets asteroids stars clusters variable stars double stars novae nebulae and galaxies Aimed principally at newcomers to astronomy of all ages who would like to begin observing for themselves and perhaps make contact with other amateur observers Philip's Stargazing with Binoculars describes a wide range of binoculars that are internationally available with examples of objects to observe taken from both northern and southern hemispheres The guidance given is appropriate for all observing conditions This brand new title includes a glossary of technical terms and an index making it even easier for the beginner to use and understand It is a practical guide to binoculars and how to achieve the best results It is fully updated to include the latest equipment on the market It is full colour throughout What if boxes suggest simple solutions to difficulties There are specially commissioned step by step illustrations and easy to use star maps covering the whole sky
