Translating Expertise Marisa L. Conte, 2016-08-29 In 2005 the National Institutes of Health NIH announced the Clinical and Translational Science Award CTSA program an institution based grant intended to re engineer the clinical research enterprise speeding the time from pre clinical discovery to the development of therapies to improve human health As universities competed for CTSA funding and often struggled to develop or recalibrate institutional infrastructures and research support services the face of pre clinical and clinical research changed dramatically These

changes and their intended and unintended consequences introduced the possibility of new roles for health sciences librarians creating novel opportunities to engage with researchers research administrators and community members as active partners in the research enterprise This book demystifies translational research by providing a comprehensive historical background and context on the CTSA program including the impact of funding reductions and administrative changes The highlight of the book are case studies by librarians from CTSA Consortium institutions These case studies including successes challenges and lessons learned will detail specific routes to librarian involvement in translational research including collection development creating and maintaining relationships with researchers and administrators instruction and training data management team science and more The variety of case studies including challenges and lessons learned will help libraries that are looking for ways to engage the translational research audiences at their institutions or those who currently work with CTS but face new challenges due to declining federal research funds shifting institutional priorities or other factors The book will not be a comprehensive accounting of librarian engagement at each institutions but rather a sample of best practices to help librarians develop programs and relationships relevant to translational research and a look at newly emerging opportunities to leverage skills in information organization and dissemination
