**A History of Magic and Experimental Science: The first thirteen centuries of our era** Lynn

Thorndike, 1923. A history of science and magic spanning the period from early Christianity through early modern Europe to the end of the 17th century.

**17 bookseller's catalogues** George Redway, 1883. *Lucifer*, 1892. *The War of the Jesus and Darwin Fishes* John C. Caiazza, 2017-09-08. This volume's title stems from an observable and seemingly amusing phenomenon: the placement of fish symbols on the rear of automobiles. There are two kinds: one a fish outline with a cross exhibited by Christians; the other a fish outline filled with the word "evolution" with little legs attached underneath. These symbols manifest the cultural war between religion and science, a clash that draws from nineteenth-century conflicts over evolution roots in the Enlightenment. Today's cultural environment is a result of the internationalization of communication, labor, money, and commerce. This global culture emphasizes tolerance and acceptance of all peoples and traditions but it also demands a moral and intellectual relativism that rejects master narratives including religious tradition as well as scientific theory. In some respects, the postmodern environment is caused by science itself by the development of postmodern science, its nineteenth-century adversarial stance toward religion now somewhat softened. Among new developments are the historical understanding of science, renewed appreciation of the troubled careers of scientists, and God talk among physicists and psychologists. Both science and religion are being overwhelmed by new levels of technology which is becoming the premier element of contemporary culture. The conflict between science and religion is being resolved in the form of a dynamic. Religion and science are both ways of giving moral and intellectual order to the universe, enabling mankind to cope with a chaotic universe and live well. Both religious critics and scientific researchers have attacked and analyzed pornography which has become a prominent characteristic of our culture. Both share contemporary sensitivity to individual opinions and protection of the individual from social control. Both science and religion share a sense that postmodern culture lacks structure. Caiazza shows how renewed attention to religious and scientific insights can resolve longstanding conflicts, providing postmodern society with a vision of tolerable order.
