vehicles assembly plants to their areas This has included tax abatements infrastructure construction land giveaways job
training programs and other subsidies As of early 2015 ten foreign vehicle makers operated 20 light vehicles in developed
North America Despite the fact that all ten of these automakers have pursued a similar pattern first exporting vehicles into
the United States and Canada before launching vehicle plants in developed North America each has followed its own specific
historical development path and has created its own unique growth trajectory This book provides a unique historical and
qualitative review of these ten vehicle makers from their early beginnings to their export entry into the United States and or
