Scientific Soapmaking Kevin M. Dunn, 2010 *Scientific Soapmaking* bridges the gap between the technical and craft literature. It explains the chemistry of fats, oils, and soaps and teaches sophisticated analytical techniques that can be carried out using equipment and materials familiar to makers of handcrafted soap.

[Safety and Health Handbook for Cytotoxic Drugs](#) Samuel J. Murff, 2012-02-20 Many healthcare workers must deal on a daily basis with the transportation, preparation, storage, clean up, and disposal of cytotoxic drugs which are used in chemotherapy because of their harmful effect on cancer cells. These drugs also have harmful effects on good cells and they therefore pose a significant health risk to those who work with them. Yet there is little safety and health information available about them and what information is available is scattered across a vast array of literature. The *Safety and Health Handbook for Cytotoxic Drugs* collects this information so that healthcare workers can better understand the drugs they work with and the safety and health procedures that should be followed. In it, author Samuel J. Murff presents comprehensive technical and procedural information on 106 of the most common cytotoxic drugs. The book provides guidance on quickly dealing with spills, reducing unnecessary exposure, and complying with pertinent regulations and standards in order to better equip healthcare workers to maintain a safe work environment.

[Textbook of Blood Banking and Transfusion Medicine](#) Sally V. Rudmann, 2005-02-18 This comprehensive book on transfusion practices and immunohematology offers concise, thorough guidelines on the best ways to screen donors, store blood components, ensure safety, anticipate the potentially adverse effects of blood transfusion, and more. It begins with the basics of genetics and immunology and then progresses to the technical aspects of blood banking and transfusion. Chapters are divided into sections on Basic Science Review, Blood Group Serology, Donation, Preparation, and Storage, Pretransfusion Testing, Transfusion Therapy, Clinical Considerations, and Safety, Quality Assurance, and Data Management. Developed specifically for medical technologists, blood bank specialists, and residents, the new edition conforms to the most current standards of the American Association of Blood Banks (AABB). Expert opinion essays written by well-known, frequently published experts discuss interesting topics of research or new advances in the field. Important terms are defined in the margins of the pages on which they appear, enabling readers to easily check the meaning of an unfamiliar term where it appears in context. Margin notes highlight important concepts and points, remind readers of previously discussed topics, offer an alternative perspective, or refer readers to other sources for further information. Material conforms to the most recent AABB standards for the most accurate, up-to-date information on immunohematology. Advanced concepts beyond what is required for entry-level practice are set apart from the rest of the text so readers can easily differentiate between basic and advanced information. A new chapter on Hematopoietic Stem Cells and Cellular Therapy (chapter 19) provides cutting-edge coverage of cellular therapy and its relevance to blood banking. New content has been added on molecular genetics.
