Advances in Religion, Cognitive Science, and Experimental Philosophy Helen De Cruz, Ryan Nichols, 2016-01-28
Experimental philosophy has blossomed into a variety of philosophical fields including ethics epistemology metaphysics and philosophy of language But there has been very little experimental philosophical research in the domain of philosophy of religion *Advances in Religion Cognitive Science and Experimental Philosophy* demonstrates how cognitive science of religion has the methodological and conceptual resources to become a form of experimental philosophy of religion Addressing a wide variety of empirical claims that are of interest to philosophers and psychologists of religion a team of psychologists and philosophers apply data from the psychology of religion to important problems in the philosophy of religion including the psychology of religious diversity the psychology of substance dualism the problem of evil and the relation between religious belief and empathy and the cognitive science explaining the formation of intuitions that unwittingly guide philosophers of religion when formulating arguments Bringing together authors and researchers who have made important contributions to interdisciplinary research on religion in the last decade *Advances in Religion Cognitive Science and Experimental Philosophy* provides new ways of approaching core philosophical and psychological problems Screen Time Lisa Guernsey, 2012-03-20
As a mother Lisa Guernsey wondered about the influence of television on her two young daughters As a reporter she resolved to find out What she first encountered was tired advice sensationalized research claims and a rather draconian mandate from the American Academy of Pediatrics no TV at all before the age of two But like many parents she wanted straight answers and realistic advice so she kept digging she visited infant perception labs and child development centers around the country She interviewed scores of parents psychologists cognitive scientists and media researchers as well as programming executives at Noggin Disney Nickelodeon Sesame Workshop and PBS Much of what she found flies in the face of conventional wisdom and led her to conclude that new parents will be best served by focusing on about educational media She examines how play and language development are affected by background and foreground television and how to choose videos that are age appropriate She explains how to avoid the hype of brain stimulation and focus instead on social relationships and the building blocks of language and literacy Along the way Guernsey highlights independent research on shows ranging from Dora the Explorer to Dragon Tales and distills some surprising new findings in the field of child development *Into the Minds of Babes* **Is Religion Natural?** Dirk Evers, Michael Fuller, Antje Jackelen, Taede Smedes, 2012-10-06 An exploration of the relationship between evolutionary psychology naturalism and theological reflections published by ESSSAT the European Society for the Study of Science and Theology **Into the Minds of Babes** Lisa Guernsey, 2007-09-11 A good news book for parents *Into the Minds of Babes* presents an engaging examination of the current research into how exposure to television and other screen time affects babies and toddlers **Acting for Animators** Ed Hooks, 2013-03-01 Ed Hooks indispensable acting guidebook for animators has been fully updated and
