**Elementary Children's Literature** Nancy A. Anderson,2002 Written in a personable tone this concise literature methods text is filled with classroom applications and teaching strategies for future teachers and parents of preschool and elementary children Organized around genres this student friendly text presents the basic children s literature course content Each genre chapter contains extensive up to date bibliographies most with annotations of books in print and a few exceptional out of print books and for each genre there is a list of evaluation criteria This exceptional textbook not only includes books about minorities in each chapter but it also features works by minority authors and illustrators Uniquely Elementary Children s Literature offers instructional and curriculum tie ins that are woven within the text and in literature response boxes at strategic places in each chapter Book illustrations are included at the beginning of each chapter as well as throughout the narrative Resources in Education ,1999-10 **Sensorimotor Psychotherapy** Pat Ogden,Janina Fisher,2015-04-27 A book for clinicians and clients to use together that explains key concepts of body psychotherapy The body s intelligence is largely an untapped resource in psychotherapy yet the story told by the somatic narrative gesture posture prosody facial expressions eye gaze and movement is arguably more significant than the story told by the words The language of the body communicates implicit meanings and reveals the legacy of trauma and of early or forgotten dynamics with attachment figures To omit the body as a target of therapeutic action is an unfortunate oversight that deprives clients of a vital avenue of self knowledge and change Written for therapists and clients to explore together in therapy this book is a practical guide to the language of the body It begins with a section that orients therapists and clients to the volume and how

to use it followed by an overview of the role of the brain and the use of mindfulness The last three sections are organized according to a phase approach to therapy focusing first on developing personal resources particularly somatic ones second on utilizing a bottom up somatic approach to memory and third on exploring the impact of attachment on procedural learning emotional biases and cognitive distortions Each chapter is accompanied by a guide to help therapists apply the chapter s teachings in clinical practice and by worksheets to help clients integrate the material on a personal level The concepts interventions and worksheets introduced in this book are designed as an adjunct to and in support of other methods of treatment rather than as a stand alone treatment or manualized approach By drawing on the therapeutic relationship and adjusting interventions to the particular needs of each client thoughtful attention to what is being spoken beneath the words through the body can heighten the intimacy of the therapist client journey and help change take place more easily in the hidden recesses of the self
