Environmental change and security report ,1997 *Human Security and the Environment* Edward Page,M. R. Redclift,2002 In the post Cold War era the pre eminent threats to our security derive from human degradation of vital ecosystems as well as the possibility of war and terrorist attack This substantial book examines this new security environment paradigm and the way in which the activities of societies are shifting the balance with nature The distinguished authors investigate this redefinition of security with particular reference to environmental threats such as climate change and the availability of adequate supplies of food and water They illustrate how unfettered economic growth rising levels of personal consumption and unsustainable natural resource and energy procurement are taking a heavy toll on the global environment This in turn is forcing both developed and developing countries to re evaluate the more immediate environmental security of their own populations For a truly global perspective the authors present a series of country case studies looking at issues of security and environment and comparing how they influence policy and human well being They also discuss a number of theoretical issues which underpin discussions of environmental security demonstrating that this is a relatively new and essentially contested concept This thought provoking book highlights the way in which both security and sustainability are being reworked as concepts and are being linked increasingly to social economic and cultural factors It will be of great interest to academics researchers and students in environmental management sociology geography international relations and politics **Dangerous Intersections** Jael Miriam Silliman,Ynestra King,1999 This collection of original

Security and Development Neclâ Yongaçoğlu Tschirgi, Michael S. Lund, Francesco Mancini, 2010 Although policymakers and practitioners alike have enthusiastically embraced the idea that security and development are interdependent the precise nature and implications of the dynamic interplay between the two phenomena have been far from clear The authors of *Security and Development Searching for Critical Connections* realistically assess the promise and shortcomings of integrated security development policies as a strategy for conflict prevention Addressing cross cutting issues and also presenting detailed country case studies they move beyond rhetoric and generalization to make an important contribution to the international conflict prevention agenda
