Essentials of International Relations EBook Folder K. Mingst,2009-05-15

Essentials of International Relations Karen A. Mingst,1999-01 This work is an introduction to the core concepts of international relations The author presents the basic tools of analysis the individual the state and the international system and shows how the primary schools of thought liberalism realism and Marxism use these tools to evaluate interactions between nations paying particular attention to security and economic issues Theory is brought

to life with examples and case studies Understanding a Changing World Donald R. Kelley, 2021-01-14 The world is becoming more complex fraught with increasing possibilities for conflict over national rivalries economic competition and cultural and ideological fault lines This clear eyed text offers a structured and theoretically grounded way to think about the forces that animate change and the alternative futures they may create Donald Kelley views both contemporary reality and the future we face through the perspective of four different paradigms that shape our way of thinking about the world The nation state paradigm built on the assumption that the traditional Westphalian nation state remains the key building block of the present and the future which leads us to predict the future in terms of the nature and alignment of nation states The economic paradigm built on the assumption that economic factors are increasingly important which leads us to see the future in terms of factors such as interdependence globalization and trade as well as the growing opposition to these developments and the prioritization of national economic needs The identity and culture paradigm built on the distinct identities and cultures of nations and regions which leads us to view the future in terms of conflicting culture based communities transcending formal national or economic interests The ideology paradigm based on a post cold war reemergence of ideological conflict within and among nations which leads us to view a world based on ideology based conflict From these paradigms and their interactions Kelley builds a series of possible alternative futures of the international system His framework provides a unique way of looking at how and why the world is changing and the many different futures some peaceful and productive some warlike and destructive and others simply dysfunctional in which we might live The African Union Omar Alieu Touray, 2016-12-01 This book offers a comprehensive analysis of the African Union during the organization's first ten years of existence It takes the reader through the various intergovernmental processes that preceded and followed the establishment of the Union and through the workings of key organs such as the Assembly of Heads of State the Council of Ministers the Pan African Parliament and the Commission The study argues that the African Union represented a rational choice of its member states who saw it as a means to advancing their individual and collective preferences for liberation peace and security good governance and socio economic development It maintains that the African Union did not only make marked progress in a number of areas the Union also established norms that had transformational effects on military and political elites at country and regional levels However like in most agent principal relations the autonomy of the Union was limited in many ways and this affected the Union's effectiveness in such areas as human and socio economic development as well as in sustaining peace support operations At a more general level the study argues that the African Union offers clear insights into integration as a multidimensional process that no single theoretical tradition can explain in a comprehensive manner The author's response to such a theoretical limitation is fusionism an integrated approach that amalgamates various analytical traditions in order to provide a better explanation of the processes of international integration The detailed analysis and bold proposals will undoubtedly make the study appealing not only to specialists in African Studies but equally

to a broader spectrum of international relations and development scholars
