[Wake Up America](#) David R. Stein, 2020-11-11. Few people living in the US today have any real appreciation or understanding of the wholesale sociopolitical changes which have occurred in the US just since the Vietnam War, to say nothing about the pre-Vietnam War era. Until recently, the changes have been insinuated into US society so gradually few realize that a significant majority of the changes are so antithetical to fundamental US constitutional principles and values that they threaten the very survival of the US as a constitutional democratic republic. Engineered as they were by a covert, insidious, and subversive Neo-Marxist campaign which has been steadily and stealthily growing in the US for more than one hundred years, many of the changes have been deliberately designed to foment social discord, dysfunction, and instability through ethnic identity politics and race-baiting, designed to pave the way for a full-fledged social revolution in which the US constitutional democratic republic would be replaced by a Neo-Marxist autocracy. The US now faces the distinct possibility of sliding into another bloody civil war or into anarchy and chaos, followed by the installment of a Neo-Marxist autocracy. To prevent both of those possibilities, significant changes must be made to the US Constitution, as well as to civil, corporate, and criminal laws. If nothing is done, millions of freedom-loving US citizens, their children, and grandchildren will wake up one day to discover that all of their cherished freedoms and liberties have been taken from them. It's now quite possible another bloody civil war will be necessary to ensure that in the immortal words of Abraham Lincoln, a government of the people, by the people, for the people shall not perish from the earth. **Eureka!** Marlene Wagman-Geller, 2010-07-06. **The NotBurger. Meat Substitution by the Use of Methyl Cellulose**

Naomi Albiez, 2023-01-16 Project Report from the year 2022 in the subject Food Technology grade 1 3 course School of Agronomy language English abstract This paper is about the Chilean company NotCo and its product NotBurger It deals with the ingredients the production of vegan meat substitutes and the nutritional values In addition the performance of a sensory triangle test is exemplified and its evaluation is discussed Due to the steady growth of the world s population and increasing wealth in developing countries the demand for protein is rising However it is difficult to meet the demand for protein with

animal protein alone. In addition, several customers attach great importance to their well-being and health, so they avoid eating meat for ecological, ethical, and social reasons. On the food industry side, a trend is emerging towards the production of plant-based protein-rich products for human consumption. In the first quarter of 2020, sales of meat substitutes in Germany increased by 37% compared to the first quarter of 2019, from just under 14.7 thousand tons to 20 thousand tons. For consumers to opt for the plant-based alternative, these products must mimic the techno-functional and sensory properties of animal products. In recent years, the offer from different manufacturers has increased, and vegan sausages, hamburgers, or chicken fillets are already widespread. As soy protein is increasingly rejected by consumers due to concerns about rainforest deforestation and genetically modified seeds, the number of products based on pea or wheat protein is increasing. Consumers are also increasingly turning their attention to other ingredients, which is why the trend is moving towards clean labeling. Here, recipes are adapted so that as many and ideally all ingredients as possible can be found in the home kitchen. The aim is to counteract the reputation that substitute products are purely chemical and unhealthy foods. However, substitutes must have the same properties in texture, taste, and color as the original ingredients. As this is often based on complex interrelationships, the substitution of methyl cellulose for flaxseed meal in a vegan hamburger will be considered individually in the course of this work. For this purpose, a sensory tasting including the recruitment of panelists and the presentation of samples will be developed.

**Y Google, ¿cómo lo haría?** Jeff Jarvis, 2012-03-28. A nadie sorprende la pregunta que plantea el título de este libro: ¿Y es que Google ha sido la empresa con el mayor crecimiento en el menor periodo de tiempo de la historia? Es una marca cuya dimensión ha alcanzado cotas inusitadas y cuya gestión se ha convertido en ejemplar en todos los mercados. Con la voluntad de saber qué se esconde tras ese éxito y más importante aún, qué podemos aprender de él, Jarvis nos descubre 40 sencillas reglas que toda empresa debe seguir. Asimismo, nos enseña a la realidad de la era digital, una era de cambios y retos constantes, pero que nos ofrece grandes oportunidades. Y para ello nos pone ilustrativos ejemplos, tales como un coche diseñado por sus conductores o una universidad en la que los estudiantes determinan su plan de estudios. Un libro sorprendente e imprescindible.
