Restoring Our Competitive Edge Competing Through Manufacturing:

Restoring Our Competitive Edge Robert H. Hayes, Steven C. Wheelwright, 1984-06-25 Recommends a manufacturing strategy that develops production facilities uses appropriate management systems and establishes firm relationships with suppliers

International Manufacturing Strategies Per Lindberg, Christopher A. Voss, Kathryn L. Blackmon, 1997-12-31 Over the last twenty years there has been an increasing number of factors that have placed the manufacturing strategies of companies and countries in a global context This book reviews and addresses the global manufacturing strategy area through research in the four major economic areas of the world Europe North America Latin America and Asia International Manufacturing Strategies Context Content and Change is the result of a single major research project undertaken in twenty countries focusing on the manufacturing strategies and practices in each and uses research data to focus on factors specific to industrial countries or regions and those which are common across the group of countries or the entire sample The core of this book is a set of chapters reviewing individual countries Each country is reviewed in a format with an overall common approach the socio economic background the distinctive results for that country from the research and the link between the two Most will be illustrated by a small case study of a company Following this is an integrating review of the findings from various countries the different trajectories followed and the impact on external variables and the socioeconomic context on those The final part of the book is devoted to new ideas and developments in functional areas and in manufacturing strategy that have been developed from the analysis conducted during the research

Strategic Management of the Manufacturing Value Chain Umit S. Bititci, Allan S. Carrie, 1998-08-31 Today the Scottish electronics industry employs 40 000 people directly and a further 30 000 in the supply infrastructure There are now more than 550 electronic manufacturing and supplier companies in Silicon Glen In terms of the contribution to the economy electronics is by far the most valuable industry Its value in 1996 was approximately 10 billion and accounted for more than half of Scotland's exports The major product groupings within the industry include PCs laptops and workstations Disk drives cable harnessing Printers keyboards and peripherals Semiconductor devices and PCBs TV VCRs CDs stereos and other consumer electronics Cellular phones and telecommunications products A TMs and funds transfer systems Networking and security systems Navigation and sonar systems Microwave products Power supplies Software and compilers Many of these companies are multi national OEMs who came to Scotland as inward investing companies Early inward investing companies were from USA followed by companies from Japan and more recently from Taiwan and Korea An important segment of the industry is involved in the manufacture of computers including IBM Compaq Digital and Sun In fact approximately 40% of the PCs sold in Europe are built in Scotland With five of the world's top eight computer manufacturers locating a manufacturing base in Scotland there has been an attraction for foreign companies keen to provide service for these multinationals In 1995 96 the supply base output was worth 1

A Journey through Manufacturing and Supply Chain Strategy Research Emilio Bartezzaghi, Raffaella

Cagliano, Federico Caniato, Stefano Ronchi, 2016-06-04 This book is intended as a tribute to Gianluca Spina the influential and inspiring Professor of Business Management Organization and Supply Chain Management at the School of Management of Politecnico di Milano who very sadly passed away early in 2015 It brings together seven of his most important papers published in renowned international journals and supplements these papers with insightful commentaries from friends and colleagues who highlight key messages and values of enduring validity The selected papers offer a clear sense of Spina's research journey over the years and cover the main research streams that distinguished his work They have also been chosen on account of their high impact as reflected by the number of citations received and to represent the most important research collaborations that Spina had established within Italy and abroad An introductory chapter relates his research to major developments in the field of Manufacturing and Supply Chain Strategy and also outlines the very important contribution that Gianluca Spina made to Management Education Innovations in Competitive Manufacturing Paul M.

Swamidass, 2012-12-06 Innovations in Competitive Manufacturing is an examination of manufacturing innovations both technical and knowledge based Over the recent past technology has created dramatic changes in manufacturing As a result the book focuses on the use of technology in gaining competitive advantage in global manufacturing Forty topics are surveyed in the book organized into thirteen chapters Each topic is a carefully written account by one or more leading researchers in that area This is the first systematic examination of the recent innovations in manufacturing strategy and technology In addition to providing an understanding of these manufacturing innovations the book underscores the strategic importance of creating and sustaining the technological resources to ensure a stable manufacturing economic base The book's purpose is to examine the elements that make today's manufacturers successful Many examples from industry throughout the book will enable the reader to appreciate and comprehend the concepts presented in the article In addition to the technical and innovative information implementation issues concerning new ideas and manufacturing practices are explored within the topical discussions Four in depth descriptions of real life cases provide illustration of key principles The book has been constructed as a reference tool for manufacturing researchers students and practitioners Hence after reading the introduction Innovation in Competitive Manufacturing From JIT to E Business any section or topic in the book can be consulted and or read in any sequence the reader may choose **World Class Manufacturing** Richard J.

Schonberger, 2008-06-30 In his best selling book Japanese Manufacturing Techniques Richard J Schonberger revolutionized American manufacturing theory and more important practice In that breakthrough book he revealed that Japanese manufacturing excellence was not culturally bound Offering the first demystified explanation of the simple techniques that fueled Japan's industrial success he demonstrated how the same methods could be put to work as effectively in U S plants Now in World Class Manufacturing Schonberger returns to tell the success stories of nearly 100 American corporations including Hewlett Packard Harley Davidson General Motors Honeywell and Uniroyal that have adopted the famed just in time

production and total quality control strategies Based on his firsthand experience as a major consultant to American industry he examines how they did it and illustrates how the same concrete specific steps used by these top companies can be implemented in any factory today What s more Schonberger shows that his bold concepts and reforms apply equally to all industries whether the product is computers pasta or trucks and to all divisions from manufacturing and engineering to accounting and marketing According to Schonberger world class manufacturing depends on blended management rather than domination by a separate group of managers which marshalls resources for continual rapid improvement To achieve world class status companies must change procedures and concepts which in turn leads to recasting relations among suppliers purchasers producers and customers Acknowledging the difficulty inherent in such changes Schonberger stresses that employee involvement and interaction both on the shop floor and in the decision making problem solving process is key Wary of those who view improvement in terms of modernizing equipment he points out that making maximum use of people and current machinery is a company s first priority automation if necessary should come much later World Class Manufacturing also includes Schonberger s 17 point action agenda to guide innovators toward manufacturing excellence from getting to know the customer to cutting the number of suppliers reducing error in production and deciding when and how to automate Indispensable for all manufacturing innovators who aim to keep ahead of the competition this inspiring groundbreaking volume does much more than just recommend or theorize about the new manufacturing approach Plainly realistically and logically it explains how it s done
