Large Countries' Development Path: Experience and Theory Yao Ouyang, 2022-03-04. This book aims to propose a unique analytical framework to find out the general successful experience for large developing countries which are defined with two main physical characters of large population and vast land. They are naturally crucial for the global development. Thirteen countries are chosen as large developing countries in this book which are China, India, Russia, Brazil, Mexico, Indonesia, South Africa, Iran, Egypt, Pakistan, Nigeria, Ethiopia, and Congo DRC. On the basis of selecting massive data, the author analyzes the performance of large countries in terms of human resources, natural resources, market size, and other factors. The book conducts the comparative study of large countries' latecomer strength transformation path and innovation strategy with the perspective of development economics. It presents a comprehensive overview about large developing countries. *Wind Energy for Power Generation* K. R. Rao, 2019-10-17. This far-reaching resource covers a full spectrum of multi-faceted considerations critical for energy generation decision makers considering the adoption or expansion of wind power facilities. It contextualizes pivotal technical information within the real complexities of economic, environmental, practical, and socio-economic parameters. This matrix of coverage includes case studies and analysis from developed and developing regions including North America and Europe, Asia, Latin America, the Middle East, and Africa. Crucial issues to power generation professionals and utilities such as capacity, credits, fuel saving, intermittency, penetration limits, relative cost of electricity by generation source, growth, and cost trends, incentives, and wind integration issues are addressed. Other economic issues succinctly discussed inform financial commitment to a project including investment matrices, strategies for economic evaluations, econometrics of wind energy, cost comparisons of various investment strategies, and cost comparisons with other energy sources. Due to its encompassing scope, this reference will be of distinct interest to practicing engineers, policy and decision makers, project planners, investors, and students working in the area of wind energy for power generation.
