This series avoids abstract futurology or grand narratives. Instead, it focuses on presenting the actual trends emerging within each industry along with specific cases and data on business models that companies and individuals can implement immediately. Intelligence Briefing for Leaders: Navigating an Era of Uncertainty in 2026 is your business lost in the fog? Or is it on the map? Moving past vague forecasts to discuss business models you should review right now. Every year, countless trend forecast books are published, yet few provide a clear answer when planners and executives in the field ask, "So what business model should we actually try in our industry?" The Next Business Model 2026 series, published by The Innovation Lab, a business trend analysis and business model consulting group, was designed specifically to address this need. This series was written based on NextBM200, a proprietary platform featuring vast data on over 5,000 business models across 25 industries. Its primary differentiator is that it deals exclusively with business models rigorously verified by data rather than intuition or speculation. This book tracks how the macro changes of 2026 are branching out into specific business forms at the ground level of each industry. Beyond fundamental statements like "AI is rising" or "Hyper-personalization is important," readers can use this book to identify specific revenue models and service structures currently operating in the market. Each volume presents a detailed analysis of promising business models worth benchmarking or adopting immediately alongside the latest industry trend data. For those who need practical references that can be applied directly to next year's business plan rather than abstract futurology, this series will serve as the most reliable database.

Key Components of the Book:

- 1 Data Driven Industry Trend Analysis:** Patterns of change observed in each of the 25 industries are objectively analyzed and organized using data from NextBM200.
- 2 Exploration of Accessible Business Models:** BM Moving beyond vague concepts, the series provides detailed analyses and introductions of specific BM cases that have either been validated in the real market or are newly emerging.
- 3 Practical Insights:** Provides insights focused on business structures and implementation points, allowing planners and executives to immediately apply and evaluate them within their own businesses.

The Next Business Model 2026 series will serve as the most practical and useful data-driven business reference for those designing and executing business in the field.
