Breaking the Code J. Richard Gentry, 2006 If only we could understand that seemingly inexplicable moment when children suddenly get reading Then our instruction could be directed toward creating those specific circumstances which help every student recognize the pattern of meaning behind the marks on a page Now thanks to Richard Gentry's Breaking the Code we can In his most important book to date Gentry combines cutting edge brain based research with sound classroom knowledge to explore early literacy development Starting with the crucial interrelationship of reading and writing he looks inside and out at the minds of emerging readers to find out how they construct the idea and process of reading Then he presents a blueprint for instruction and early intervention that combines his new findings with best practice teaching His comprehensive instructional model focuses on building the specific skills capacities and experiences kids need by teaching them to write as they learn to read Gentry gives you everything you need to implement successful beginning reading strategies as well as a variety of effective tips for supporting readers and writers throughout the primary grades Writing with the same clarity and teacher friendly approach as in his best selling The Science of Spelling Richard Gentry will show you how scientific thinking and student centered teaching can work together to create powerful literacy instructional practices Let Breaking the Code open a window for you into the minds of young readers so that you can open a window for them into a world of literate possibilities **Forum**, 1987 **Blueprints for Better Learning** Florence Damon Cleary, 1968

Arnold, 1989 **Everyday Astrology**, 1943 Popular Science Monthly, 1919 Sight Word Shape Books Dwayne Douglas Kohn, 2017-01-13 Create 100 sight word booklets The fun shape of each booklet makes learning new words easy A student who has mastered 100 of the most common words in the English language is on his/her way to becoming a fluent reader These 100 words form the basis of reading You will be amazed how many of these words appear in the text of a typical newspaper article or on a random page of a book Children will LOVE learning sight words with these booklets Each time they make a new book your students will race home to share their new word with their family To make the booklets simply cut out the pages being careful not to cut off the letters Put the pages in order longest page on bottom shortest page on top to spell the word Staple together on the left hand side You may wish to have the students write the sight word on each page or a sentence using the sight word on each page For example for the SEE book students could write I see a star on the first page They could then write I can see an elephant on the second page and finally Can you see the blue egg on the last page Students may also illustrate their sentences with a small picture The 100 sight words in this title are a about after all an and are as at be been but by call can come could day did do down each find first for from get go had has have he her him his how I if in into is it its just know like little long look made make many may more most my no not now of on one only or other out over said see she so some than the their them then there these they this time to up use very was we were what when
