Friesen, Phoebe Ellsworth, 2013-10-22 Emotion in the Human Face Guidelines for Research and an Integration of Findings reviews research findings about the link between the face and emotion and provides some guidelines for study of this complicated but intriguing phenomenon Some of the conceptual ambiguities that have hindered research and the methodological decisions that must be made in planning research on the face and emotion are discussed How past investigators handled these matters is presented critically and a set of standards is offered This book is comprised of 21

chapters and begins with an overview of questions about how the face provides information about emotion with emphasis on evidence based on scientific research largely in psychology The reader is then introduced to conceptual ambiguities and methodological decisions related to research on the face emotion connection including sampling along with some important research findings In particular emotion categories and dimensions that observers can judge on the basis of facial behavior are analyzed and whether such judgments can be accurate The similarities and differences in facial behavior across cultures are also considered along with the relative contribution of facial behavior and contextual information to the judgment of emotion This monograph is intended primarily for students of psychology anthropology ethology sociology and biology as well as those planning or already conducting research on the face

Darwin and Facial Expression Paul Ekman,2006 In Darwin and Facial Expression Paul Ekman and a cast of other notable scholars and scientists reconsider the central concepts and key sources of information in Darwin s work on emotional expression First published in 1972 to celebrate the centennial of the publication of Darwin s *The Expression of the Emotions in Man and Animals* Darwin and Facial Expression is the first of three works edited by Dr Ekman and others on the subject This Malor edition contains new and updated references Darwin claimed that we cannot understand human emotional expression without understanding the emotional expressions of animals as our emotional expressions are in large part determined by our evolution Not only are there similarities in the appearance of some emotional expressions between man and certain other animals but the principles that explain why a particular emotional expression occurs with a particular emotion also apply across species

Faces Milton E. Brener, 2000 Scientists have emphasized the innate genetically based nature of our fascination with the human face and its almost limitless expressive capacity all of which is represented in the art of the last six centuries But little attention has been paid to the anomaly of the vacuous expressions of earlier facial representations Brener attributes this change to a change in the functioning of the human brain as well as the role of cultural factors It is the evolution of both genes and culture that has resulted in a marked increase in the human ability to create and interpret facial expressions The result of this has impacted human behavior

What the Face Reveals Paul Ekman, Erika L. Rosenberg, 2005-04-14 While we have known for centuries that facial expressions can reveal what people are thinking and feeling it is only recently that the face has been studied scientifically for what it can tell us about internal states social behavior and psychopathology Today's widely available sophisticated measuring systems have allowed us to conduct a wealth of new research on facial behavior that has contributed enormously to our understanding of the relationship between facial expression and human psychology The chapters in this volume present the state of the art in this research They address key topics and questions such as the dynamic and morphological differences between voluntary and involuntary expressions the relationship between what people show on their faces and what they say they feel whether it is possible to use facial behavior to draw distinctions among psychiatric populations and how far research on automating facial measurement has progressed The book also includes follow up commentary on all of the original research presented and a concluding integration and critique of all the contributions made by Paul Ekman As an essential reference for all those working in the area of facial analysis and expression this volume will be indispensable for a wide range of professionals and students in the fields of psychology psychiatry and behavioral medicine

From Guilt to Shame Ruth Leys, 2009-01-10 Why has shame recently displaced guilt as a dominant emotional reference in the West After the Holocaust survivors often reported feeling guilty for living when so many others had died and in the 1960s psychoanalysts and psychiatrists in the United States helped make survivor guilt a defining feature of the survivor syndrome Yet the idea of survivor guilt has always caused trouble largely because it appears to imply that by unconsciously identifying with the perpetrator victims psychically collude with power In *From Guilt to Shame* Ruth Leys has written the first genealogical critical study of the vicissitudes of the concept of survivor guilt and the momentous but largely unrecognized significance of guilt's replacement by shame Ultimately Leys challenges the theoretical and empirical validity of the shame theory proposed by figures such as Silvan Tomkins Eve Kosofsky Sedgwick and Giorgio Agamben demonstrating that while the notion of survivor guilt has depended on an intentionalist framework shame theorists share a problematic commitment to interpreting the emotions including shame in anti-intentionalist and materialist terms
