Isolation and Identification of Lipase-producing Microorganisms Kimber J. Logan-Dunn,2003 **Lipase** B.K. Konwar,Kalpana Sagar,2018-05-23 Microbial lipases are industrially important and have gained attention due to their stability selectivity and broad substrate specificity Lipases are used as medicine and they also aid in indigestion heartburn allergy to gluten in wheat products celiac disease Crohn s disease and cystic fibrosis This volume considers the industrial demand for new sources of lipases with different catalytic characteristics that stimulate the isolation growth and development of new microbial strains The volume narrates the challenging metagenomic approach with the isolation of the lipase gene its cloning into Escherichia coli culture of the recombinant bacteria and extraction and assessment of the lipase enzyme Lipase producing bacteria are available in different habitats such as industrial wastes vegetable oil processing factories dairy plants and soils contaminated with oil and oil seeds among others This volume is the effort of the authors to document the scientific findings carried out over the last eight years in the area of un culturable soil microorganisms The book presents the physic chemical features of lipases and their specific applications in different commercial industries The in depth study looks at metagenomics for lipases from all angles and provides a truly informative resource It describes the biochemical characterization of lipase enzymes with the high activity in the presence of 1% tributyrin A wide review has been presented in the book on lipase enzymes purified from a large collection of microbes present in soil seawater waste dumping sites animal systems including human beings and the atmosphere Stability of enzymes over changing environments of the industry is indeed a big issue and the book deals at length with the changing temperatures and pH and metal ion concentrations
