More departments than ever are offering courses in positive psychology and demand for these courses is consistently high. Graduate programs offering concentrations in positive psychology have appeared at both masters and doctoral level. Educational institutions have expressed interest in using principles of positive psychology to inform institutional structure, faculty development, and pedagogy. Positive psychology has been taught and applied in higher education for almost as long as it has existed as a field, but there is little in the way of published literature that brings all of these developments together. The chapters in this volume represent the use of positive psychology at all levels of higher education, from institutional practices and curricular development to pedagogy and the teaching of positive psychology content itself. This book provides an in-depth look at this exciting area of applied positive psychology which will be relevant to educators and administrators alike. This book is based on a special issue of *The Journal of Positive Psychology*. *The Oxford Handbook of Undergraduate Psychology Education* Dana S. The Psychologically Literate Citizen Dana Dunn, 2013-01-01 The concepts of psychological literacy and the psychologically literate citizen promise to invigorate a new global approach to psychology education They pose a basic question What attributes and capabilities should undergraduate psychology majors acquire Many psychological organizations have defined psychological literacy by guidelines and lists of student learning outcomes but although psychology educators across the globe have been working towards helping students to acquire these attributes over the past 50 years educators have only recently explicitly delineated attributes and learning outcomes and sought to develop appropriate learning teaching and assessment strategies including whole program approaches The contributors to this volume argue that psychological literacy is the most important outcome of an undergraduate psychology education and that psychologically literate citizens use their knowledge of psychology to problem solve in ethical and socially responsible ways that directly benefit their communities In this book a rich variety of international perspectives contribute to the development of the two key concepts of psychological literacy and the psychologically literate citizen Authors provide practical guidance for classroom psychology educators as well as curriculum developers and reviewers Ultimately they make the case for a paradigm shift in psychology education

Subject Guide to Books in Print ,2001

Assessing Emotional Intelligence Peter Carblis,2008 In this groundbreaking book the author advocates that many relational collapses are the result of ineptitude rather than ill will That is they are the result of a lack of skills rather than a lack of goodwill As this book puts it many of society s relational problems may be competency related This might be good news since competencies can be learned The purpose of this book is to take a careful look at how such competencies can be developed Beginning with the view that if such competencies can be learned they must first be defined and have standards set for them it asks the question Can competency standards be designed for soft skills It is argued that the answer is yes Locating itself in the workplace context where adults often spend most of their lives but relevant to life in general this book shows how theoretically sound competency standards can be developed for selected soft skills This is done by adapting a methodology used to specify workplace competency standards The book also notes a number of practical and ideological issues that must be considered at implementation This book shows how standards for three such skills have been developed and provided with a preliminary workplace validation The skills selected are related to interpersonal skills and are derived from the framework of emotional intelligence competencies popularised by Goleman This is an important book for those in business studies
