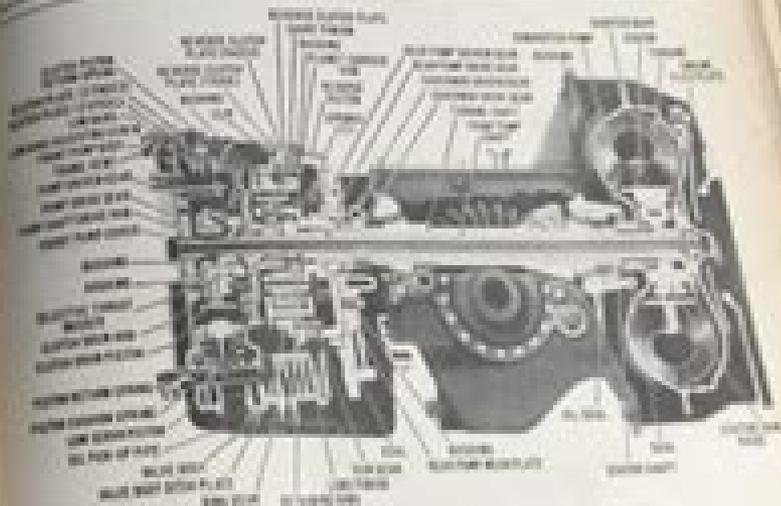

Fig. 1. Powerglide

### DESCRIPTION

The Corvair Powerglide transmission is a four-speed manual transmission. It is designed to provide smooth, quiet operation and long service life. The transmission is mounted to the rear of the engine and is connected to the rear axle via a driveshaft. The Powerglide transmission is available in two configurations: standard and heavy-duty. The standard configuration is suitable for most Corvair models, while the heavy-duty configuration is designed for increased load capacity and performance.

### MAINTENANCE

Adding Oil  
The Corvair Powerglide transmission requires regular oil changes to ensure proper lubrication and performance. The recommended oil grade is SAE 75W-90. The oil should be checked at regular intervals and replaced as needed. The oil level should be maintained at the correct level to prevent excessive wear and tear on the internal components. The transmission should also be inspected for leaks and other signs of wear. Regular maintenance is essential for the long-term reliability of the Powerglide transmission.
