Motivation and Foreign Language Learning David Lasagabaster, Aintzane Doiz, Juan Manuel Sierra, 2014-07-31 Motivation is a key aspect of second language learning There is no doubt that abstract models are basic to gain theoretical insights into motivation however teachers and researchers demand comprehensible explanations for motivation that can help them to improve their everyday teaching and research The aim of this book is to provide both theoretical insights and practical suggestions to improve motivation in the classroom With this in mind the book is divided into two sections the first part includes innovative ideas regarding language learning motivation whereas the second is focused on the relationship between different approaches to foreign language learning such as EFL English as a foreign language CLIL Content and Language Integrated Learning or immersion and motivation Both sections have an emphasis on pedagogical implications that are rooted in both theoretical and empirical work

How important is motivation in second language learning? I. Magel, 2017-06-15 Seminar paper from the year 2012 in the subject Didactics for the subject English Pedagogy Literature Studies grade 2 0 Saarland University language English abstract

Motivation in second language learning is an increasingly important area in applied linguistics The current state of research is characterized by many different approaches which have developed over time Today there are still divided views about motivation The social psychological approach dominated until the early 1990s Criticized later supplemented and eventually

replaced by pedagogical and psychological concepts In order to understand the importance of motivation in second language learning it is important to look at different types of motivation after clarifying the definition of the term motivation used in the text below This paper has been divided into three parts First I will give a definition of the term motivation Then I will focus on different kinds of motivation especially the distinctions between motivation regarding learning in general by Deci and Ryan and motivation especially in language learning by Gardner Finally the practical part deals with motivation in second language classroom in Saarland Thus the main question addressed in this paper is How important is motivation in second language learning

Motivation and Second Language Learning Tanja Lins, 2007-11 Seminar paper from the year 2005 in the subject English Language and Literature Studies Linguistics grade 86% High Distinction Monash University Melbourne School of Linguistics course Second Language Acquisition 13 entries in the bibliography language English abstract Why do people learn second languages Why do for example Australians study Japanese or Korean people study French The answers to these questions are important according to Rebecca Oxford 1994 because motivation is considered by many researchers to be one of the main determining factors in success in developing a second or foreign language p 12 Gardner even claims L2 motivation to be the primary factor in L2 learning in his socio educational model 1994 p 361 Therefore an investigation of the components of motivation and the influence of motivation on L2 learning seems quite reasonable This essay will focus on the concept of motivation in second language learning Initially the definition of the term motivation shall be discussed and this will be followed by an identification of the key terms Then the attention shall be drawn to research results concerning the importance of motivation as influencing second language learning The essay will discuss Gardners quantitative approach and a recent research of Ushioda shall be taken into account that seeks to provide an alternative qualitative approach This approach focuses on students beliefs and thinkings rather than on measurable and observable activity A final chapter will focus on implications for teaching

Motivation as a Factor in Second Language Acquisition Katharina Ochsenfahrt, 2012-05-29 Seminar paper from the year 2012 in the subject English Language and Literature Studies Linguistics grade 2 3 [http://www.uni-jena.de/Anglistik/Amerikanistik/course/Second Language Learning/language English/abstract/The limits of my language are the limits of my world](http://www.uni-jena.de/Anglistik/Amerikanistik/course/Second%20Language%20Learning/language%20English/abstract/The%20limits%20of%20my%20language%20are%20the%20limits%20of%20my%20world) This quotation by Ludwig Wittgenstein a famous philosopher of the 19th century shows how important second language learning is in our modern society Language is one of the main components of the society and culture of the people who speak it People speaking different languages are important for the community in which they work and live because they can connect different cultural groups Besides this social factor there is an economic need for multilingual people as well Apart from the requirement of translators and interpreters there are an increasing number of jobs where people are required to interact with people from foreign countries The ability of communicating in two or more language can be an essential reason for getting your dream job Another advantage of speaking different languages is that it makes travelling much easier and gives you the opportunity of maintaining friendships with people from all over the world Nowadays most children start

learning a second and even a third language when they are still very young. Mostly they are not aware of the benefits of speaking different languages for their later lives. They simply learn it because it is in the curriculum of their school which is designed for the needs of society rather than for the learner's interests. This does not seem like a good point of departure for a successful learning process. So it is the teacher's major challenge to motivate the students to put effort in learning the foreign language. But how does motivation influence second language learning? This paper will define motivation and introduce different motivation theories. Then it will discuss the influences of motivation on second language learning.

Motivation and Motivating in the Foreign Language Classroom Steffi Joetze, 2011-06-27 Seminar paper from the year 2008 in the subject Didactics for the subject English Pedagogy Literature Studies grade 2.0 University of Cologne language English abstract The study of motivation to learn a L2 is a thoroughly discussed and researched subject in the field of L2 acquisition. Nevertheless, questions like What is motivation? How do humans get motivated? What specifies motivation in language learning? Nakata 2006 p. 23 are very difficult, maybe even impossible to answer entirely. So the aim of the following investigation should not be to give a complete picture of research on L2 motivation but to explore special parts of this extensive topic more precisely and to find out what exactly a teacher can contribute to a motivational teaching in the L2 classroom. To show how to enhance students' motivational intensity, it is necessary to know what motivation is. Therefore, the complex theoretical concept of motivation itself will be dealt with at first in this paper. Furthermore, there are various kinds of motivation which have been identified by researchers. Some of them will be presented in connection with their theoretical concepts and with reference to this, it should be discussed if there is a type of motivation being most effective in terms of L2 learning. In a further step, the factors of L2 motivation influencing the level of L2 learning motivation will be investigated in more detail. Having dealt with the nature of motivation itself and its factors, the research will have a more practical orientation to the foreign language classroom. For that, the point of view will be directed towards teachers and their possibilities of using motivational strategies and techniques in the foreign language classroom. The question how students' motivation can be increased should be the issue to discuss in this place.

The New Handbook of Language and Social Psychology W. Peter Robinson, Howard Giles, 2001-06-08 What makes a good argument? How is language used to create social influence? How social is computer-mediated communication? This new, fully updated and revised *The New Handbook of Language and Social Psychology* reflects the increasingly diverse range of linguistic topics that social psychologists have investigated over the decade since the previous edition of this seminal work was published. Whilst the basic organization of the text remains the same, explanatory frameworks are accorded greater prominence than before and persons are seen as agents of communicative interaction rather than as victims of external forces. Processes and actions are highlighted, i.e. how people do what they do and how they manage the discourse. In the final section, several applied topics reflect our changing lifestyle: computer-mediated communication, mass media, and organizations. *The New Handbook of Language and Social*
