*Education of Young Children Caught in Disasters* Judit Szente, 2026-02-19 This book addresses different types of disasters both human crises and environmental disasters and their implications on the education and social emotional development of young children birth through age 8 This volume is a new edition to *Assisting Young Children caught in Disaster Multidisciplinary Perspectives and Interventions* that highlighted 14 different disasters This edition revisits some of the main topics in the previous edition from 2018 and also focuses on some recent crises such as community and school violence infectious diseases recent gang activities in Haiti and child trafficking during and after the COVID 19 pandemic Furthermore it provides strategies regarding trauma informed practice and coping with the aftermath of violence terrorism and living in war torn contexts As both the research literature and current events indicate almost every day children around the world experience some type of a crisis According to UNICEF s 2023 report there have been an unprecedented number of humanitarian emergencies natural and human made unfolding around the world These include violence armed conflicts floods earthquakes and hurricanes Children who experience these conflicts most likely also experience poverty and become more vulnerable to malnutrition and diseases As the previous edition indicates such crises and trauma have various consequences on the lives of children such as Post Traumatic Stress Disorder PTSD and depression Although governments and agencies have done a large amount of work to address the needs of children affected by disasters early childhood teachers often still feel helpless and not prepared to address these needs in their classrooms This new edition provides both pre and in service early childhood teachers with such support

*Dopamine Kids* Michaelen Doucleff, 2026-03-03 From the bestselling author of *Hunt Gather Parent* comes a revolutionary five step guide packed with practical science backed strategies that shows you how to raise confident happy kids while breaking the cycle of overdependence on screens and ultraprocessed foods Nearly everything you ve heard about dopamine is wrong No it s not the molecule of happiness And no it doesn t give us pleasure it gives us motivation For the first time in history we are inundated with what are known as dopamine surges inside our brains These surges pull us to technology like magnets every day many times a day Over the past decade neuroscientists have finally begun to figure out how these surges alter our choices our habits and even our moods We ve learned how dopamine can drive adults and kids to engage in activities that we don t actually enjoy activities that can make us feel sad lonely anxious and depressed When Michaelen Doucleff PhD the New York Times bestselling author of *Hunt Gather Parent* decided to address her family s screen time and dependence on processed foods she found that scientific study after scientific study refuted nearly all the claims she d read in the media about dopamine and the supposed reasons we re so inclined to pick up our phones or raid the pantry She took this new neuroscience and psychology and merged it with practical experience shifting the power dynamic back to families instead of devices and foods controlling us we control them and both screens and the pantry become tools rather than burdens *Dopamine Kids* is a five step operating manual for habit

remodeling that is tailored for parents and their children After rediscovering what s most important for your family you ll learn how to create successful boundaries around screens and ultraprocessed foods replace screen time with equally enticing activities remove triggers that pull children toward screens and junk food and finally celebrate your family s choices before during and after trying new hobbies These five steps weaken the neurological pathways established by devices and make dopamine work in your favor to get kids to want to pursue high quality activities that reduce anxiety create better moods and diversify interests Dr Doucleff s research culminates in a four week plan to create screen free sanctuaries that protect conversations focus sleep and adventure After reading Dopamine Kids you will be empowered to create habits that genuinely fulfill your family s biological and emotional needs bring true fulfillment and purpose to their lives and improve their behavior happiness and confidence The Anxious Generation alerted you to the danger of screens but the demands of the twenty first century require that you use them anyway Dopamine Kids is your handbook for solving that fundamental problem of our times and teaching your kids to have a healthy relationship with technology and food
