Artificial Intelligence in Real-Time Control M. G. Rodd,G. J. Suski,2014-05-23 Artificial Intelligence in Real Time Control documents the proceedings of the IFAC Workshop held in Clyne Castle Swansea UK 21 23 September 1988 It includes two keynote addresses that discussed architectural issues for expert systems in real time control the problem of representing knowledge and reasoning and the problems encountered in obtaining such information Other papers contained in these proceedings are representative of the major research bodies active throughout the world in the application of AI techniques in real time control although it was inevitable that a Europe based conference would highlight the work of the European groups While AI is clearly still in the process of establishing itself it is undoubtedly a major new area of engineering endeavor Practical experience is still relatively limited and many of the results discussed at this event were obtained through simulation or in a few cases from reduced practical experience The importance though lies in the fact that many countries are pouring extensive resources into the attempt to control difficult processes by using AI techniques The wide cross section of interest was demonstrated by the fact that many diverse industries were represented at the workshop ranging from power systems control to telecommunications and into the steel industry

**Artificial Intelligence Risk Management** Kurt J. Engemann,2025-12-01 AI demonstrates the potential to impact virtually every aspect of modern life making it one of the most transformative technologies of our time AI has a wide range of applications across various sectors and as AI continues to evolve its integration into various activities is expected to deepen further changing how we work live and interact with the world around us AI systems from simple machine learning models to advanced autonomous
