Feelings are not meant to be pushed down or dismissed. Here's how to make sure your kids know what to do with theirs. If you're like most parents, one of your primary concerns about your child, aside from their health and safety, is how you can prepare them for adulthood. There are the usual concerns about meeting the milestones for their age, the frequent comparisons with their peers, and the rush to buy every book and toy that will help them be smarter, stronger, or faster. We worry about their physical and mental prowess because these are the typical qualities that we're taught to build up in our children so that they grow up to be successful. But less lauded abilities like resilience, patience, and empathy also play a significant role in a child's future success. In fact, these abilities and other qualities associated with emotional intelligence are a greater predictor of future success than having a high IQ. Fortunately, emotional intelligence is something that can be taught and developed, and the ideal time to do it is while your kids are still young. If you need help navigating this aspect of your child's development, you can get some direction from this practical guide that will show you the methods for building emotional intelligence. In *Raising Emotional Intelligence in Kids*, you will discover how to help your child identify, understand, and make sense of their emotions when they are still too young to verbalize them well. Your parenting type and how you could be affecting your child's self-esteem and outside relationships. The 1 thing to keep in mind to keep you from losing your mind when your child is having yet another tantrum. 9 effective responses to misbehavior that don't involve punishment. Why you should stop asking your child "Why" and what to ask instead to get more than a one-word response. The essential trait that will enable your child to face any obstacle.

that comes their way even when you're not there to help them How to get your child to respond peacefully but forcefully to a bully What you should never say to your child when talking about a sensitive issue Easy calming exercises you can do with your child to develop mindfulness and help them deal with fluctuating emotions And much more We are all born with our natural inclinations and personalities Some kids will be more extroverted and high energy while others will be shy and sensitive But no matter how rowdy ill tempered or withdrawn your child is there's always a way to help them handle their emotions You may not see results right away but with constant practice and guidance you will be able to see the little improvements in how they respond to you and to unpleasant situations Give your child the tools and support they need to face the highs and lows of life and set them on the path from moody child to emotionally healthy adult If you want to prepare your child for a successful future not just in their career but also in their personal life and relationships then scroll up and click the Add to Cart button right now

Most of us can remember at some point in our lives yearning for a best friend. Things are even more complicated for children now as the media has introduced children into the world of adult allelics before they are emotionally ready. Our children don't know just instinctively how to build good relationships with other children in a culture like this to change the rules. Fortunately, healthy children generally make healthy choices even in the context of hard-to-match situations. That means that if children have good relationships at home, they have a healthy advantage, but they still need their help to learn how to navigate a complex social world. Developing emotional intelligence in childhood provides an important foundation for good mental health throughout a child's life and increases their chances of having lasting and healthy relationships with those around them. Emotional intelligence improves a person's resilience, helping them to quickly recover from setbacks and disappointments. They are also more likely to have a good set of values that guide their behavior toward others. For children, evidence has shown that learning these skills means they are better able to make and maintain healthy friendships and deal with bullying in positive and appropriate ways. Research shows that children do better in school when they are emotionally and socially conscious. They are also much less likely to become a bully and can work through negative emotions such as sadness, anger, fear, anxiety, and frustration. What can parents do? Children are not born with these skills; emotional intelligence and social intelligence they learn from their parents, brothers, and sisters, family members, caregivers, and friends as they grow up. Evidence suggests that the period from birth to early school age is critical to developing these skills. The role of parents in building social and emotional intelligence is critical, and there is much parents can do to develop these skills and encourage their children's development. One of the most important ways children learn behaviors and abilities is by observing their parents. Modeling good behavior and demonstrating healthy relationships shows kids how social and emotional skills work. Parents should work to build their own strong friendships and to provide good examples of interaction with people, both friends and strangers, on a daily basis. Showing how to deal with errors, setbacks, and problems is also important. Observing how you address these situations can be a good learning opportunity for kids. Do you want your child to want to cooperate without screaming, bribery, threats, or punishment? Would you like to connect more with your child to build a stronger, sweeter bond instead of fighting for control? Do you want to raise children who grow up in happy, considerate, responsible, and competent people? Want to know how to raise a 21st-century child using eternal values? Do you want to feel more inspired and confident as a parent? Want to know how to raise an emotional and socially intelligent child? This book is the right one.
