Chapter 5 Summary: Mental Status Assessment

Chapter 5 of *Jarvis, Physical Examination and Health Assessment* focuses on the assessment of a patient's mental status, which reflects the emotional and cognitive functions that influence overall health. Mental status assessment helps clinicians determine how well patients think, feel, and interact with their surroundings. Key components of mental status include consciousness, language, mood, affect, orientation, attention, memory, abstract reasoning, thought processes, and perceptions. The chapter also addresses special considerations for assessing children, older adults, and individuals from different cultural backgrounds.
