**Developing Children as Researchers** Chae-Young Kim, Kieron Sheehy, Lucinda Kerawalla, 2017-03-21 Encouraging young children to create and carry out their own social research projects can have significant social and educational benefits. In addition, their research may help them to influence local and national policies and practices on issues that matter to them. To support this, *Developing Children as Researchers* acts as a practical guide to give teachers and other adults who work with children a set of structured, easy-to-follow session plans that will help children to become researchers in their own right. Comprising of ten session plans that have already been tried and tested in schools, this guide will assist you in supporting child researchers while helping you to develop the techniques for teaching research skills effectively. The session plans also ensure that children's views are heard and reflected by encouraging their active curiosity and investigation of issues that they may be concerned about. Forming a step-by-step guide, the ten sessions cover themes such as starting the research process and identifying a research topic, the three key principles of research: be sceptical, systematic and ethical, choosing research participants and drawing up a research plan, the range of data collection and analysis methods, reporting the results of and reflecting upon a research project. Children's research has often depended upon the support of academic researchers to provide resources and training. By making the research training and facilitation process more widely accessible, this guide will help remove the psychological and practical hurdles that teachers and others who regularly work with children might feel about helping children's research themselves.

**Leadership and Management Compendium** David Obatomi, 2024-09-04 A complete dependence on capable leadership is one of few things every organisation has in common. In the absence of talented leadership, the workforce and by extension the entire business cannot achieve its full potential. Leadership and Management are two very different concepts though are intrinsically interconnected. For an organisation to perform at its best, a strategic combination of both Leadership and Management is required. It's one thing to master the art of effective delegation, instruction, and supervision. It's something else entirely to inspire a workforce to achieve more by setting a strong example. To become a talented manager and an inspiring leader is to enjoy extraordinary career prospects worldwide. This booklet is a compilation of all the assignments and answers provided through thorough research using a wide range of resources. It is anticipated that the compendium will be a valuable document to consult for anyone aspiring to be an excellent manager or leader in their organisation.
