[The impact of art therapy on mental health and well-being](#) Helena José,Joao Apostolo,Luciano Vitorino,Luis Manuel Mota de Sousa,Martina Giusti,2023-12-22 In 2019 the WHO came out with a scoping review related to the evidence on the role of the arts in improving health and well being In the last yeast in fact literature has recognized the direct and indirect benefits of art in the prevention and promotion of mental and physical health and in the management and treatment of disease Although some countries have made progress in developing policies that make use of the arts to support health and well being many have not yet addressed the opportunities that exist for using the arts to support health and for others policy activities have been time limited Nonetheless the relationship between art and health has existed since the birth of medicine itself and has strongly influenced its history and its evolution Art therapy is the main expression of art in health care The integration of art in traditional health assistance paths sustains the need to have a

holistic approach to health wellness and well being both of patients and other stakeholders including caregivers and healthcare professionals Currently the main area of art therapy application is mental health with especially regards to disability both in developmental age and in elderly and both to cognitive and physical impairment and dementia However it is important to remark that mental health does not only refer to mental illness but also to people s emotional psychological and social well being These last cases have particularly worsened with the long lockdown periods due to the COVID 19 pandemic
