

# Costal Engineering

Costal Engineering is a branch of civil engineering that deals with the design and construction of structures and systems for coastal protection and management. It involves the study of coastal erosion, sediment transport, and the impact of sea level rise on coastal infrastructure.

The primary focus of costal engineering is to develop effective strategies to protect coastal areas from erosion and flooding. This includes the design of coastal defense structures such as seawalls, dunes, and beach nourishment projects. Additionally, costal engineers work on the development of coastal management plans that take into account the long-term sustainability of coastal resources.

Key areas of research and practice in costal engineering include:

- Coastal erosion and sediment transport
- Sea level rise and coastal flooding
- Coastal defense structures and systems
- Coastal management and planning
