Self Help Mindset Training Guide:

A Guide for Developing a Culture of Caring Through Nursing Peer Mentorship Programs Deborah Kramer, 2024-08-19
This book describes in detail how to develop successful programs of nursing mentorship utilizing concepts of caring that yields a strong caring body of nurses who will be nurse thrivers as they find fulfillment and meaning in their professional commitment and will train others to do the same. The mentorship program is the ticket to success that many students need to complete their degree program, prevent burnout, pass the nursing NCLEX examination, and remain in the workforce after graduation. The current attrition rate in baccalaureate nursing programs is 25-50% as is the attrition rate in the first 2 years of employment of new RNs entering the workforce. Burnout is due to a lack of care and support for helping the students navigate the rigor and demands of the nursing program. Creating a community of learners with caring and support creates an environment that fosters academic engagement and success. The unique aspect of this book is its focus on creating a caring environment to support the students, helping them develop caring skills, empathy, resilience, and their own self-care, developing the skills for success beyond their educational process into the workforce. This book integrates all patterns of knowing: personal, aesthetic, empiric, and ethical, and provides the missing link of peer mentorship necessary to the development of resilient, emancipated nursing students and graduates capable of working in community with others to establish cultures of care in health care. This is a must-have resource for transformation of nursing education in the next century. Foreword by Dr. Margaret McClure. **Handbook of Positive Psychology in Schools** Kelly-Ann Allen, Michael J. Furlong, Dianne Vella-Brodrick, Shannon Suldo, 2022-02-23. The Handbook of Positive Psychology in Schools offers the most current and comprehensive insights into how positive psychology principles provide a framework for young people to become active agents in their own learning. The third edition of this groundbreaking volume assembles the latest global research identifying fundamental assets: hope, optimism, gratitude, self-efficacy, emotional regulation, among others that support students' learning and well-being. Chapters examining social-ecological perspectives on classroom quality and school climate provide best practice guidance on schoolwide policies and practices. These 35 new chapters explore positive psychology's ongoing influence and advances on prevention, intervention, and assessment practices in schools. Resources in Education, 1988-09. **Steps to Success** Helen Williams, Christy Watts, 2002. Implementation Science to Address Health Disparities and Improve the Equitable Implementation of Proven Interventions Mechelle Sanders, Karla Galaviz, Oscar Gil, 2024-02-08. As health research moves through the translation pipeline, some minoritized groups have been left behind. This gap in translation has worsened and/or become more apparent for many during the COVID-19 pandemic. Implementation science can help address this gap by guiding the equitable dissemination and implementation of health interventions, healthcare policies, and practices. With significant research focus on implementation of proven health interventions, there is a tremendous opportunity to ensure all individuals have access to and benefit from lifesaving healthcare and health.
