Processes to Advance Multimodal Transportation Projects** Donald J. Emerson,Doris Lee,Crystal M. Cummings,Jennifer
Thompson,Bridget M. Wieghart,Shelly Brown,2016 This report analyzes approaches taken by state departments of
transportation DOTs their local partners and other project sponsors to satisfy National Environmental Policy Act NEPA
requirements for transportation projects involving more than one mode Specific objectives of the research were to 1
characterize the challenges inherent in satisfying the NEPA requirements of multiple U S DOT agencies 2 identify strategies
and tactics that state and local transportation agencies have used to overcome these challenges and 3 suggest new and
innovative strategies that can be applied by state and local transportation agencies in future multimodal NEPA processes
Twelve case studies illustrate successful practices and provide examples of institutional arrangements used to comply with
NEPA requirements for two or more U S DOT agencies The case studies demonstrated that there is no single best way to
approach the NEPA process for multimodal situations Success may depend more on the willingness and motivation of the
agencies to work together to find common ground and to work around differing processes and less upon a specific
organizational structure An effective interagency approach depends on how well the project sponsor and other agencies are
able to work together and bridge their procedural differences **Care at the Close of Life: Evidence and Experience**
