Basic Advanced Prehospital Trauma Life Support Military Edition:

PHTLS National Association of Emergency Medical Technicians (U.S.). Pre-Hospital Trauma Life Support Committee, 2007 As the required textbook for NAEMT's worldwide prehospital trauma life support courses Prehospital Trauma Life Support PHTLS is the definitive resource for learning basic and advanced prehospital trauma skills and concepts Now revised and expanded to cover all aspects of prehospital trauma with new chapters on burns wilderness trauma tactical considerations weapons of mass destruction triage and disaster management and environmental trauma the 6th edition is the ultimate trauma text for any prehospital care provider The 6th edition is also ideal for use as the trauma component of an EMT or paramedic course or as a general reference tool on trauma assessment and management **PHTLS**, 2004-08

Prehospital Trauma Life Support PHTLS 5th Edition Military Version is a unique continuing education program that directly addresses trauma issues in the prehospital environment Following the publication cycle of ATLS Advanced Trauma Life Support by the Committee on Trauma of the American College of Surgeons the PHTLS program is designed to enhance and increase knowledge and skill in delivering trauma care The PHTLS textbook is the required book for the PHTLS course and is also ideal for use as the trauma component of a paramedic course or as a general reference book on trauma assessment and management Based on Prehospital Trauma Life Support PHTLS 5th Edition this military version combines both basic and advanced trauma concepts and skills in one definitive resource and features an entirely new chapter on evidence based guidelines for military medicine developed by the Committee on Tactical Combat Casualty Care Instructor resources available contact your sales representative for details A companion CD ROM with video presentations of the airway and spinal skills used in PHTLS is now included with every book It also contains information to download onto a PDA such as the Glasgow Coma Scale Revised Trauma Score Rule of 9's Parkland Formula and Pediatric Vital Signs Content includes both basic and advanced training and has been updated to reflect the current ATLS guidelines complete with extensive references and suggested readings A consistent approach for every body region makes the book easy to follow and includes content on anatomy and physiology pathophysiology and assessment and management Includes chapters on Injury Prevention Golden Principles of Prehospital Trauma Care and Triage Transport and Trauma Systems Golden Principles of Trauma Care chapter includes information on prolonged transportation and additional treatment for a trauma patient when transportation times are greater than normal Case Scenarios with end of chapter solutions and Review Questions are included for every chapter to promote critical thinking and assess knowledge NAEMT Airway thoracic and spinal skills are presented in a heavily illustrated step by step format as Specific Skills The Airway Management and Ventilation chapter includes information on face to face intubation an alternate method of intubating trauma patients It also defines the difference between pharmacologically assisted intubation and rapid sequence intubation Includes information on tools such as pulse oximetry and capnography A difficult airway algorithm aids students in determining which airway adjuncts are appropriate and when

they should be used Includes new photographs geared specifically to the military Describes differences in procedures in a non combat situation and those in a combat situation The Military Medicine chapter written by the military provides special trauma considerations and protocols Military procedures are also found throughout the text where applicable SOF Combat Casualty Care Handbook Combined Arms Center , This handbook was previously distributed as a supplement to the Journal of Special Operations Medicine The realm of special operations forces SOF medicine is a unique and ever changing one that demands specialized training for our joint SOF Managing trauma on today s battlefield presents a dynamic array of challenges where limited resources can be rapidly overwhelmed An austere environment hostile gunfire and delays in casualty evacuation CASEVAC are the norms for the special operations medic The material in this handbook was gleaned from special operations medics operating in the Global War on Terrorism and other operational environments It should not be viewed as a substitute for the professional training and judgment of special operations medics rather it is designed to be a hip pocket reference on the tactics techniques and procedures TTP of SOF relevant tactical combat casualty care Key Lessons Ninety percent of combat loss of life occurs before casualties ever reach a military treatment facility MTF treatment prior to casualty evacuation is vital Litter carries are fundamental for good patient care they prevent further injury and get individuals off target as soon as possible Rehearse manual carry methods prior to deployment Every special operations warfighter should carry a tourniquet and be thoroughly familiar with its application When managing multiple casualties apply the principles of triage in classifying the priority of treatment and evacuation Rehearse and employ all of the mechanics of CASEVAC from the point of injury to the handover at a MTF This handbook provides a number of considerations when employing medical support to SOF in combat The challenges are numerous but the special operations medic must deliver medical care to save Soldiers lives The collection of TTP in this handbook will enhance the medic s ability to determine the optimum method to deliver casualty survival assistance Journal of Special Operations Medicine ,2008 **Medical Response to Major Incidents and Disasters** Sten Lennquist,2012-01-03 This book written by members of the core faculty responsible for European courses on Medical Response to Major Incidents MRMI is a practical guide for all medical staff on how to respond to a wide range of disaster scenarios The entire spectrum of knowledge is covered from command and coordination through to the management of individual casualties Central importance is attached to the key component of decision making by explaining what needs to be done for patients in particular situations and the required order and timing of treatment measures Simplified methods receive due attention as it is often necessary for medical staff to administer primary treatment outside of their own specialty This book will prove an invaluable aid to all who may be involved in the response to major accidents and disasters including medical and nursing students ambulance crew and military personnel as well as medical specialists **Ranger Medic Handbook** U.S. Department of Defense,2016-01-19 Historically in warfare the majority of all combat deaths have occurred prior to a casualty ever receiving advanced trauma management The execution

of the Ranger mission profile in the Global War on Terrorism and our legacy tasks undoubtedly will increase the number of lethal wounds Ranger leaders can significantly reduce the number of Rangers who die of wounds sustained in combat by simply targeting optimal medical capability in close proximity to the point of wounding Directing casualty response management and evacuation is a Ranger leader task ensuring technical medical competence is a Ranger Medic task A solid foundation has been built for Ranger leaders and medics to be successful in managing casualties in a combat environment The true success of the Ranger Medical Team will be defined by its ability to complete the mission and greatly reduce preventable combat death Rangers value honor and reputation more than their lives and as such will attempt to lay down their own lives in defense of their comrades The Ranger Medic will do no less

Capturing the Full Power of Biomaterials for Military Medicine National Research Council, Division on Engineering and Physical Sciences, National Materials Advisory Board, Board on Manufacturing and Engineering Design, Committee on Capturing the Full Power of Biomaterials for Military Medical Needs, 2004-08-06 Recent results in biomaterials R D suggest that there are exceptional opportunities for these emerging materials in military medicine To facilitate this possibility the National Research Council convened a workshop at the request of the Department of Defense to help create a technology development roadmap to enhance military R D into biomaterials technology The workshop focused primarily on identifying useful near and mid term applications of biomaterials including wound care tissue engineering drug delivery and physiological sensors and diagnostics This report presents a summary of the workshop It provides a review of biomaterials and their importance to military medicine the roadmap and a discussion of ways to enable biomaterials development Several important outcomes of successful capture of potential benefits of these materials are also discussed

PHTLS National Association of Emergency Medical Technicians (U.S.). Pre-Hospital Trauma Life Support Committee, 1999 The PREHOSPITAL TRAUMA LIFE SUPPORT PHTLS course is a unique continuing education program created from the real need in EMS education for additional training in the handling of trauma patients The course and the book PREHOSPITAL TRAUMA LIFE SUPPORT educate EMS personnel to identify stabilize treat and transport trauma patients with the highest level of care Prehospital patients who are stabilized and then quickly transported to an appropriate medical facility have the best chance of survival Identifying the mechanism of injury interpreting signs and symptoms understanding pathophysiology recognizing life threatening injuries and honing assessment skills all help the EMT to identify a trauma patient with multiple injuries and perform appropriate interventions PHTLS treats the trauma patient as a special entity with needs that differ from those of other patients Provides the most current information available through revised and updated chapters which adhere to the new 1998 ATLS guidelines Features comprehensive coverage for both basic and advanced level training Emphasizes the foundation of trauma care specifically understanding the mechanism of injury Includes in depth coverage of anatomy and physiology pathophysiology assessment and management of trauma to key body systems and regions Covers special patient populations including pediatrics

geriatrics and pregnant patients to refresh the EMT regarding the importance of understanding the differences in physiology and presentation in these special populations Contains an entire chapter devoted to trauma care in the military because prehospital care in military situations is indisputably different than most civilian trauma situations Promotes clear practical understanding of the proper procedures for airway and spine skills with separate chapters that outline techniques and procedures with photos alongside text in a step by step format Includes chapter objectives summary and review questions to help the student self assess and pick out key points from the material Includes case scenarios and conclusions to promote critical thinking and allow the student to see real application of the concepts discussed in each chapter Provides a comprehensive glossary and bibliography to direct the reader when further study on a particular topic is desired Incorporates more than 300 full color illustrations many updated and enlarged from previous edition to aid in visual learning comprehension of material explanation of difficult concepts and keep reader s interest
