

CONTROL 2012

CONTROL is being held again in Stuttgart from May 8th to the 11th. This trade fair has been around for 26 years already and we have been presenting our test devices there since that time. The trade fair began in Sindelfingen with 97 presenters that year when the subject of quality assurance was not yet really an issue. That has permanently changed. Today we are one of over 800 exhibitors at the trade fair and over 24,000 trade visitors from 88 countries prove the high value of quality assurance and this event.

The rapid growth of our business enables us to present a small highlight at **CONTROL** nearly every year. This year we presented the compact EC15 rotor. Designed for non-contact crack detection on wires, this rotor's small dimensions and low weight allow it to be used in the interesting field of handling machines, e.g. for the testing of cylindrical parts (see the reports on pages 5 and 6).

There was a great amount of interest so we were able to take some of the inquiries regarding this topic back home with us.

Just like every year, this year many visitors once again took advantage of the opportunity to discuss their testing tasks with us, presented us with their smaller and larger task assignments, and were very often able to leave the booth with a verifiable response regarding their feasibility. Once or twice we heard visitors say, „This already made the visit to the trade fair worthwhile for us!“ That means that this year's appearance at **CONTROL** can once again be considered a success.
