Data Mining Applications. A Comparative Study for Predicting Student's Performance Saurabh Pal, 2017-11-02 Doctoral Thesis Dissertation from the year 2014 in the subject Computer Science General course DOCTOR OF PHILOSOPHY language English abstract The primary objective of this research is to develop a process to accurately predict useful data from the huge amount of available data using data mining techniques Data Mining is the process of finding trends patterns and correlations between fields in large RDBMS It permits users to analyse and study data from multiple dimensions and approaches classify it and summarize identified data relationships Our focus in this thesis is to use education data mining procedures to understand higher education system data better which can help in improving efficiency and effectiveness of education In order to achieve a decisional database many steps need to be taken which are explained in this thesis This work investigates the efficiency scalability maintenance and interoperability of data mining techniques In this research work data results obtained through different data mining techniques have been compiled and analysed using variety of business intelligence tools to predict useful data An effort has also been made to identify ways to implement this useful data efficiently in daily decision process in the field of higher education in India Mining in educational environment is called Educational Data Mining Han and Kamber describes data mining software that allow the users to analyze data from different dimensions categorize it and Summarize the relationships which are identified during the mining process New methods can be used to discover knowledge from educational databases Every data has a lot of hidden information The processing method of data decides what type of information data produce In India education sector has a lot of data that can produce valuable information This information can be used to increase the quality of education But educational institution does not use any knowledge discovery process approach on these data Information and communication technology puts its leg into the education sector to capture and compile low cost information Now a day a new research community educational data mining EDM is growing which is intersection of data mining and pedagogy First chapter of the thesis elaborates the knowledge data
